Applied Issues In Investigative Interviewing Eyewitness Memory And Credibility Assessment:

Applied Issues in Investigative Interviewing, Eyewitness Memory, and Credibility Assessment Barry S. Cooper, Dorothee Griesel, Marguerite Ternes, 2013-02-01 Contingent on funding being available a Festschrift will be held in honor of Dr John Yuille's career as a Forensic Psychologist. He has become one of the most visible and respected Canadian psychologists worldwide. In light of his upcoming retirement in December 2006 the Festschrift will recognize Dr Yuille's achievements in the areas of eyewitness memory research i.e. pioneering a new research paradigm that grants better validity investigative interviewing i.e. the development and use of the Step Wise Interview Protocol and credibility assessment i.e. introducing Statement Validity Analysis to North America. New directions for future work will be explored at the workshop. The focus of this Festschrift will be three fold: 1 International Dr Yuille's work has influenced law enforcement practices and stimulated research in and outside of Canada. The international and multicultural aspects of the work that Dr Yuille has inspired will be reflected and promoted by this workshop. 2 Interdisciplinary Dr Yuille is internationally known as an expert consultant and trainer to law enforcement. As such Dr Yuille's work has also influenced other disciplines e.g. the law, social work, oral history. The participants of this Festschrift will gain insight into other professionals' perspectives and foster potential collaborations on future projects. 3 Emphasis on applied research. A hallmark of Dr Yuille's research has been the application of field and archival methods which made his work directly applicable to forensically relevant contexts. The potential future directions of applied forensic research will be discussed at this Festschrift. The importance of the subject at this time. A lack of integrative models in the literatures of eyewitness memory and the assessment of truthfulness and deception. Presenters of the Festschrift have recently developed such models and will discuss them at the Festschrift. Publishing these models and their discussions will spark further research to validate or modify them. New pioneering field research based on such integrative models has recently been conducted. This book would be one of the first publications of the results. **The Routledge**

Jason J. Dickinson, Nadja Schreiber Compo, Rolando Carol, Bennett L. Schwartz, Michelle McCauley, 2019-02-21 For as long as we have been researching human memory psychologists have been investigating how people remember and forget This research is regularly drawn upon in our legal systems Historically we have relied upon eyewitness memory to help judge responsibility and adjudicate truth but memory is malleable prone to error and susceptible to bias Even confident eyewitnesses make mistakes and even accurate witnesses sometimes find their testimony subjected to harsh scrutiny Emerging from this environment the Cognitive Interview CI became a means of assisting cooperative witnesses with recalling more information without sacrificing accuracy First used by police interviewing adult witnesses it is now used with many populations in many contexts including public health accident reconstruction and the interrogation of terror suspects Evidence Based Investigative Interviewing reviews the application of cognitive research to investigative interviewing revealing how principles of cognition memory and social dynamics may increase the accuracy of eyewitness testimony It provides evidence based applications for investigators beyond the forensic domain in areas such as eyewitness identification detecting deception and interviewing children Drawing together the work of thirty three authors across both the academic and practice communities this comprehensive collection is essential reading for researchers in psychology forensics and disciplines such as epidemiology and gerontology *Handbook of Research Methods in Human Memory* Hajime Otani, Bennett L. Impact of Internal and External Influences on Memory and their Relevance to Legal Decisions Fabiana Battista, Antonietta Curci, Ivan Mangiulli, Henry Otgaar, 2024-08-02 The fallibility of memory has been often demonstrated. A plethora of studies has focused on external influences that can affect memory reports such as suggestive questioning. Adopting different paradigms e.g. misinformation, memory conformity, the recurrent pattern of findings of these studies is that suggestion can make people prone to falsely recall details that were never experienced i.e. commission errors, false details. In addition, suggestion can make them unable to recall truly experienced events or event-related details. However, internal influences can also affect memory. One such internal influence is deception. In the last decade, several studies have investigated how memory can be affected by deception. Specifically, these studies have shown that a person who has intentionally deceived the listener about an experienced event subsequently when the person comes forward with the truth shows an impaired memory for such an event. This line of research examined the detrimental effects on memory by taking into account different strategies to deceive e.g. false denials, feigned amnesia, and fabrication and found that the memory outcomes due to deception can vary based on the strategy used to deceive. A number of studies has also demonstrated that another type of deception known as self-deception can influence our memory. This strategy relies on the act of deceiving our own selves and seems to reduce the recall of negative memories. The understanding of the effects of external e.g. suggestion and internal e.g. deception, self-deception on memory is important not only in order to gain more fundamental information on how memory works but also because of the relevance of memory functioning within the legal context. Memory distortions, for example, inaccurate eyewitness testimony can lead to impactful legal decisions such as wrongful convictions. Several studies have underlined the harmful consequences of distorted statements. Additional support is found in databases from various worldwide associations who strive to obtain fair justice for people involved in wrongful convictions cases, for instance www.innocenceproject.org. Therefore, it is important that researchers continue to provide evidence on the mnemonic impact of internal and external factors that influence legal practitioners to help avoid miscarriages of justice.
