Atlas of Macroscopes Katy Börner, Elizabeth G. Record, Todd Theriault, 2025-10-14 A fascinating data adventure through the lens of macroscopes which offer us illuminating and holistic views of our ever changing world In *Atlas of Macroscopes* Katy Börner, Elizabeth Record and Todd Theriault take you on an epic data adventure You will explore data landscapes designed as uniquely interactive spaces and learn more about our world and your place in it You will gain new perspectives on how to gather, understand and communicate data as well as how to best use it You will discover what it means to touch data that informs and inspires Transcending the static nature of the maps featured in the initial trilogy, this fourth *Atlas* showcases 40 real life macroscopes or interactive data visualizations that were displayed in the first decade 2015-2024 of the traveling exhibit *Places, Spaces, Mapping Science* Encompassing vast amounts of data, macroscopes give us holistic views of complex systems or networks They provide an entry point for scientists and laypeople alike and empower us to engage directly with large datasets and to conduct our own lines of questioning As interactive tools, macroscopes connect data creators and users As portals to continuously evolving data, macroscopes can serve as windows to the dynamics of any terrain, personal or professional, local or global and offer key insights into our surroundings and even our place in the universe While big data is creating new ways to view and understand information, macroscopes help us see the big picture as we seek to better navigate our ever changing world

Dissemination of Cartographic Knowledge Mirela Altić, Imre Josef Demhardt, Soetkin Vervust, 2017-09-07 This book gathers 22 papers which were presented at the 6th International Symposium of the ICA Commission on the History of Cartography in Dubrovnik, Croatia on 13-15 October 2016 The overall conference theme was *The Dissemination of Cartographic Knowledge: Production, Trade, Consumption, Preservation* The book presents original research by internationally respected authors in the field of historical cartography, offering a significant contribution to the development of this field of study but also of geography, history and the GIS sciences The primary target audience includes researchers, educators, postgraduate students, map librarians and archivists

Atlas of Forecasts Katy Börner, 2021-08-31 Forecasting the future with advanced data models and visualizations To envision and create the futures we want, society needs an appropriate understanding of the likely impact of alternative actions Data models and visualizations offer a way to understand and intelligently manage complex, interlinked systems in science and technology, education and policymaking *Atlas of Forecasts* from the creator of *Atlas of Science* and *Atlas of Knowledge* shows how we can use data to predict, communicate and ultimately attain desirable futures Using advanced data visualizations to introduce different types of computational models, *Atlas of Forecasts* demonstrates how models can inform effective decision making in education, science, technology and policymaking The models and maps presented aim to help anyone understand key processes and outcomes of complex systems dynamics, including which human skills are needed in an artificial intelligence empowered economy what progress in science and technology is likely to be

made and how policymakers can future proof regions or nations This Atlas offers a driver s seat perspective for a test drive of the future Encyclopedia of Library and Information Sciences John D. McDonald,Michael Levine-Clark,2017-03-15 The Encyclopedia of Library and Information Sciences comprising of seven volumes now in its fourth edition compiles the contributions of major researchers and practitioners and explores the cultural institutions of more than 30 countries This major reference presents over 550 entries extensively reviewed for accuracy in seven print volumes or online The new fourth edition which includes 55 new entire and 60 revised entries continues to reflect the growing convergence among the disciplines that influence information and the cultural record with coverage of the latest topics as well as classic articles of historical and theoretical importance **The Oxford Handbook of Social Networks** Ryan Light,James Moody,2020 The Oxford Handbook of Social Networks gathers forty leading scholars in social networks who link the distinct practices of social network scholars in the social sciences Each chapter provides a succinct background to and future directions for distinctive approaches to analyzing social networks theoretical methodological or substantive The Handbook serves as a resource for graduate students and faculty new to networks looking to learn new approaches scholars interested in an overview of the field and network analysts looking to expand their skills or substantive areas of research **Science Dynamics and Research Production** Nikolay K. Vitanov,2016-08-01 This book deals with methods to evaluate scientific productivity In the book statistical methods deterministic and stochastic models and numerous indexes are discussed that will help the reader to understand the nonlinear science dynamics and to be able to develop or construct systems for appropriate evaluation of research productivity and management of research groups and organizations The dynamics of science structures and systems is complex and the evaluation of research productivity requires a combination of qualitative and quantitative methods and measures The book has three parts The first part is devoted to mathematical models describing the importance of science for economic growth and systems for the evaluation of research organizations of different size The second part contains descriptions and discussions of numerous indexes for the evaluation of the productivity of researchers and groups of researchers of different size up to the comparison of research productivities of research communities of nations Part three contains discussions of non Gaussian laws connected to scientific productivity and presents various deterministic and stochastic models of science dynamics and research productivity The book shows that many famous fat tail distributions as well as many deterministic and stochastic models and processes which are well known from physics theory of extreme events or population dynamics occur also in the description of dynamics of scientific systems and in the description of the characteristics of research productivity This is not a surprise as scientific systems are nonlinear open and dissipative The Book of Circles Manuel Lima,2017-05-02 In this follow up to his hugely popular The Book of Trees and Visual Complexity Manuel Lima takes us on a lively tour through millennia of circular information design Three hundred detailed and colorful illustrations from around the world cover an encyclopedic array of subjects architecture urban planning fine art

design fashion technology religion cartography biology astronomy and physics all based on the circle the universal symbol of unity wholeness infinity enlightenment and perfection Clay tokens used by ancient Sumerians as a system of recording trade are juxtaposed with logos of modern retailers like Target Venn diagrams are discussed alongside the trefoil biohazard symbol symbols of the Christian trinity and the Olympic rings and a diagram revealing the characteristics of ten thousand porn stars displays structural similarities to early celestial charts placing the earth at the center of the universe Lima's introduction provides an authoritative history of the circle and a preface describes his unique taxonomy of the many varieties of circle diagrams rounding out this visual feast for infographics enthusiasts
