

Atlas Copco's FD refrigerant dryers

Based on years of experience in the industry, Atlas Copco has chosen to incorporate direct expansion technology with cycling, non-cycling and Variable Speed variants in its range.

Direct expansion dryers without Saver Cycle Control (non-cycling)

PL0000

- Applications: stable dewpoint, full load applications.
- Key advantage: fixed speed dryers run continuously to ensure a stable dewpoint by design (irrespective of varying load conditions).
- Range: FD 5-20-00.

Direct expansion dryers with Saver Cycle Control (cycling)

PL0000

- Applications: varying temperatures, varying flows.
- Key advantage: cycling dryers shut down the refrigerant compressor at lower load conditions which leads to significant energy savings.
- Range: FD 5-10-10.

Variable speed dryers (VSD = Variable Speed Drive)

PL0000

- Applications: varying temperatures, varying flows.
- Key advantage: VSD dryers match the energy consumed to the actual compressed air used. This ensures supreme energy savings as well as a stable dewpoint across the whole spectrum of temperature and flow.
- FD 750-4000 VSD.

Atlas Copco Fd 285 Manual
