Mobile Communications A. Jagoda, M. de Villepin, 2013-11-11 1 1 COMMUNICATION WHILE TRAVELLING The pace of our daily life has been increasing for several decades Our needs have multiplied as new products have appeared and then been replaced after a few years or even months of existence by a more fashionable product or one of higher performance The life cycles of the technologies used in consumer and professional electronic products are also becoming shorter This acceleration is an inherent fact of our consumer society and the relationship between people and machines are Lifestyles due to the multiplicity of ephemeral consumer products Objects changing no longer have a history they are merely tools which fulfil a predetermined function Personal portable products are of a new type which has appeared among pens wallets these impersonal objects This category includes watches handbags calculators portable radios and pocket telephones As these products for the pocket are carried on one s person they belong in a very personal way and have therefore a specific identity corresponding to the image which they are given In the evolution of lifestyles the explosive increase of travel and time management are major factors The pocket telephone is therefore remarkable for two reasons It is not only an impersonal tool or product but is also very much a personal portable product The possibility of distant communication while travelling being able to call or be called at will anywhere at any time permits the pocket telephone to be often considered as a desirable almost magic personal item
