Disrupted banking system may lead to financial risk as its characteristics links one market to another and one financial service institution to another. If a bank fails, another bank may do so, and even non-banking system, financial system and generally domestic macroeconomics and other states may fail; thus, systemic risk attracted both central bank and banking supervising institutions' attention throughout world. This study wants to answer the question: Why a bank is called Systemic Bank and how is the Systemic Bank regulation in national banking system? The descriptive analytic research used normative approach, with secondary data. The study found that a bank is called systemic as the banking world's default risk can be systemic related to its transmitting ability, and a bank's failure can contribute to another's failure in banking transaction. The effect of default bank can spread to non-financial companies for the bank provides loan to other companies. The Law No.9 of 2016 about Prevention and Management of Financial System Crisis is published leading to the regulation about the assignment of Systemic Bank. Coordinating with Bank of Indonesia the OJK assigns Systemic Bank and Capital Surcharge semiyearly in normal condition.
