Fundamentals of Electrochemical Corrosion Ele Eugene Stansbury, Robert Angus Buchanan, 2000-01-01 Covering the essential aspects of the corrosion behavior of metals in aqueous environments this book is designed with the flexibility needed for use in courses for upper level undergraduate and graduate students for concentrated courses in industry for individual study and as a reference book Standard Potentials in Aqueous Solution Allen J. Bard, Roger Parsons, Joseph Jordan, 2017-11-22 The best available collection of thermodynamic data The first of its kind in over thirty years this up to date book presents the current knowledge on Standard Potentials in Aqueous Solution Written by leading international experts and initiated by the IUPAC Commissions on Electrochemistry and Electroanalytical Chemistry this remarkable work begins with a thorough review of basic concepts and methods for determining standard electrode potentials Building upon this solid foundation this convenient source proceeds to discuss the various redox couples for every known element The chapters of this practical time saving guide are organized in order of the groups of elements on the periodic table for easy reference to vital material AND each chapter also contains the fundamental chemistry of elements numerous equations of chemical reactions easy to read tables of thermodynamic data and useful oxidation state diagrams Standard Potentials in Aqueous Solution is an ideal handy reference for analytical and physical chemists electrochemists electroanalytical chemists chemical engineers biochemists inorganic and organic chemists and spectroscopists needing information on reactions and thermodynamic data in inorganic chemistry And it is a valuable supplementary text for undergraduate and graduate level chemistry students

Handbook of Corrosion Data Bruce D. Craig, David S. Anderson, 1994-12-31 This book makes it easy for you to find what effect environment has on the corrosion of metals and alloys However this volume offers information on additional environments including concrete soil groundwater distilled water sodium acetate and more There is also updated and expanded coverage of previously discussed environments as well as information on environments which deal with the dairy food brewing aerospace petrochemical and building industries The environments are listed alphabetically Each listing includes a general description of the conditions a comment on the corrosion characteristics of various alloys in such a situation a bibliography of recent articles specific to the environment tables consolidating and comparing corrosion rates at

various temperatures and concentrations for various alloys and graphical information Also included are summaries on the general corrosion characteristics of major metals and alloys
