Atlas Climate Change Responsibility Atmospheric:

Atlas of Climate Change: Responsibility and Obligation of Human Society Wenjie Dong, Jianbin Huang, Yan Guo, Fumin Ren, 2015-11-25 This atlas and reference resource assembles the latest research findings on the responsibility and obligation of human society for historical climate change. It clearly and quantitatively estimates to what extent the developed and developing world are responsible for historical climate change with regard to anthropogenic carbon and sulfur emissions as well as global carbon trade and so provides a potential tool to address the controversial issue of carbon emission reduction in international climate negotiations. Since the quantitative attribution of historical climate change is calculated based on CMIP5 models, the fidelity of these models in representing the observed climate change is also evaluated. In addition to evaluation, future climate change based on CMIP5 models is also shown both on global and regional scales, especially for China and its surrounding areas in terms of surface air temperature, precipitation, sea surface temperature, atmospheric circulations, and Arctic Sea ice. The atlas also makes various comparisons among different multi-model ensemble methods in order to obtain the most reliable estimation. **World Atlas of Atmospheric Pollution** Ranjeet S. Sokhi, 2008 Provides a revealing global overview of air pollution and its startling impact through graphical and visual representation of data.

Impact of Climate Change on Water Resources Komaragiri Srinivasa Raju, Dasika Nagesh Kumar, 2017-12-29 This book gives an overview of various aspects of climate change by integrating global climate models, downscaling approaches, and hydrological models. It also covers themes that help in understanding climate change in a holistic manner. The book includes worked-out examples, revision questions, exercise problems, and case studies, making it relevant for use as a textbook in graduate courses and professional development programs. The book will serve well researchers, students, as well as professionals working in the area of hydroclimatology. **Climate Change and American Policy** John R. Burch, Jr., 2016-08-26 Climate change has long been a contentious issue even before its official acknowledgment as a global threat. In 1979, Government policies have varied widely from Barack Obama's dedication to environmentalism to George W. Bush's tacit minimizing of the problem to Republican officials' refusal to acknowledge the scientific evidence supporting anthropogenic climate change. Presented chronologically, this collection of important policy-shaping documents shows how the views of both advocates and deniers of climate change have developed over the past four decades. Spacelab, 1994 **Climate Change Liability** Richard Lord, Silke Goldberg, Lavanya Rajamani, Jutta Brunnée, 2011-12-01 As frustration mounts in some quarters at the perceived inadequacy or speed of international action on climate change and as the likelihood of significant impacts grows, the focus is increasingly turning to liability for climate change damage. Actual or potential climate change liability implicates a growing range of actors, including governments, industry, businesses, non-governmental organisations, individuals, and legal practitioners. *Climate Change Liability* provides an objective, rigorous, and accessible overview of the existing law and the direction it might take in seventeen developed and developing countries and the European Union. In some

jurisdictions the applicable law is less developed and less the subject of current debate In others actions for various kinds of climate change liability have already been brought including high profile cases such as Massachusetts v EPA in the United States Each chapter explores the potential for and barriers to climate change liability in private and public law **The National Climate Program Act and Global Climate Change** United States. Congress. House. Committee on Science, Space, and Technology. Subcommittee on Natural Resources, Agriculture Research, and Environment,1988
