Recent Strategies in High Risk Surgery Joel Faintuch, Salomao Faintuch, 2024-05-28

Major surgical societies have been publishing perioperative recommendations for over half a century based on committees conducting reviews of the literature. Surgical books fundamentally target the intraoperative period when anesthesia is going on. Fatalities are often embedded in a larger context of systemic failures in which initial problems are sidestepped or mishandled till they become overwhelming and irreversible. There must be a guiding principle and a truly integrated approach for each condition and treatment of course based on the strongest available evidence. This unique book provides the reader standardized instructions and recommendations on the management of all high risk surgical candidates in different specialties and contexts encompassing a continuum of care and not just in selected phases or groups. Written by worldwide experts it is divided in 11 sections and 41 chapters which discuss Preoperative evaluation, Lifestyle interventions, Surgical specialties, Protocols of special relevance, Fluids, electrolytes and shock, Perioperative surgical challenges, Bedside and adjunct procedures, Wound care, Innovative Approaches including artificial intelligence and machine learning, End of life care and other ethical challenges. It also includes an additional section with supplementary material. Residents, fellows, practitioners in training and seasoned professionals seeking society recertification primarily in surgery, anesthesiology, intensive care medicine, internal medicine, emergency services, trauma, vascular surgery, nursing and physical therapy will find this book valuable. Professionals in the industry especially those related to surgery, critical care, monitoring devices, imaging, diagnosis and interventional radiology, policy makers and government agencies will also benefit from this work.
