Approaches to the Study of Intercultural Transfer Thomas Adam, 2019-10-31 *Approaches to the Study of Intercultural Transfer* presents a collection of compelling case studies in the areas of social reform museums philanthropy football nonviolent resistance and holiday rituals such as Christmas that demonstrate key mechanisms of intercultural transfers Each chapter provides the application of the intercultural transfer studies paradigm to a specific and distinct historical phenomenon The chapters not only illustrate the presence or even the depth and frequency of intercultural transfer but also reveal specific aspects of the intercultural transfer of phenomena the role of agents of intercultural transfer and the transformations of ideas transferred between cultures thereby contributing to our understanding of the mechanisms of intercultural transfers Antiques ,1927 **Ball and Surface Arithmetics** Rolf-Peter Holzapfel, 2013-04-17 This monograph is based on the work of the author on surface theory connected with ball uniformizations and arithmetic ball lattices during several years appearing in a lot of special articles The first four chapters present the heart of this work in a self contained manner up to well known basic facts increased by the new functorial concept of orbital heights living on orbital surfaces It is extended in chapter 6 to an explicit HURWITZ theory for CHERN numbers of complex algebraic surfaces with the mildest singularities which are necessary for general application and proofs The chapter 5 is dedicated to the application of results in earlier chapters to rough and fine classifications of PICARD modular surfaces For this part we need additionally the arithmetic work of FEUSTEL whose final results are presented without proofs but with complete references We had helpful connections with Russian mathematicians around VENKOV VINBERG MANIN SHAFAREVICH and the nice guideline of investigations of HILBERT modular surfaces started by HIRZEBRUCH in Bonn More recently we can refer to the independent until now study of Zeta functions of PICARD modular surfaces in the book L R edited by LANGLANDS and RAMAKRISHNAN The basic idea of introducing arrangements on surfaces comes from the monograph BHH BARTHEL HOFER HIRZEBRUCH where linear arrangements on the complex projective plane $\mathbb{P}^2$ play the main role Germany and the World since 1815 Thomas Adam, 2024-09-26 This textbook provides a history of modern Germany locating the country's social cultural and political developments within their proper global and transnational context The author argues that most developments in German culture society and politics throughout the nineteenth and twentieth centuries were caused by wider global and transnational trends A history of the German people rather than the German state the book focusses on non state and non government actors intercultural transfers and applies the approach of thick description to analysing the creation of German culture society and identity from the era of the Napoleonic wars right up to the present post unification Germany This includes an examination of German migrants' journeys to their new homes in the Americas and thus the creation of a global German diaspora with cultural and social networks beyond its home country's borders The book further focusses on the transfers that connected German society and culture with those of other countries for instance chapters

cover the transfer of football from England to Germany the transfer of the Christmas holiday tradition from Germany to other countries and the development of eugenics in Germany within its global context **Magazine Antiques** ,1927
