Neurocomputational perspective Paul M. Churchland, **Paul Churchland** Brian L. Keeley,2006 Offers an introduction to Churchland s work alongside a critique of his most famous philosophical positions *Scientific and Philosophical Perspectives in Neuroethics* James J. Giordano,Bert Gordijn,2010-02-18 While neuroscience has provided insights into the structure and function of nervous systems hard questions remain about the nature of consciousness mind and self Perhaps the most difficult questions involve the meaning of neuroscientific information and how to pursue and utilize neuroscientific knowledge in ways that are consistent with some construal of social good Written for researchers and graduate students in neuroscience and bioethics *Scientific and Philosophical Perspectives in Neuroethics* explores important developments in neuroscience and neurotechnology and addresses the philosophical ethical and social issues and problems that such advancements generate It examines three core questions First what is the scope and direction of neuroscientific inquiry Second how has progress to date affected scientific and philosophical ideas and finally what ethical issues and problems does this progress and knowledge incur both now and in the future Theoretical Issues in Psychology Sacha Bem,Huib Looren de Jong,2006 This thoroughly revised edition of the classic textbook explores a wide range of problems in psychology philosophy cognitive and brains sciences identifying the major topics debates and controversies and presenting them in a balanced and accessible manner for students **The Nature of Concepts** Philip Van Looke,2012-10-12 The Nature of Concepts examines a central issue for all the main disciplines in cognitive science how the human mind creates and passes on to other human minds a concept An excellent cross disciplinary collection with contributors including Steven Pinker Andy Clarke and Henry Plotkin On the Contrary Paul M. Churchland,Patricia Smith Churchland,1998 Paul and Patricia Churchland take on their critics __with verve combativeness and generosity *Theoretical Issues in Psychology* Sacha Bem,Huib Looren de Jong,2013-05-22 Bem and de Jong present complex ideas in an accessible manner *Theoretical Issues in Psychology* gives undergraduate psychology students all the resources they need to begin reflecting on the most pressing conceptual issues in their discipline Stuart Wilson Queen Margaret University The 3rd edition of *Theoretical Issues in Psychology* provides an authoritative overview of the conceptual issues in psychology which introduces the underlying philosophies that underpin them It includes new insights across the philosophy of science combined with increased psychological coverage to show clearly how these two communities interrelate ensuring an integrative understanding of the fundamental debates and how they link to your wider studies Key features of this new edition include Concise paragraphs multiple examples and additional summaries throughout to help you focus on key areas of knowledge Textboxes with definitions and key concepts to help your understanding of the main debates and ideas New content on the philosophy of mind philosophy of science cognition and cognitive neuroscience New up to date material on consciousness and evolutionary

psychology For lecturers and teachers PowerPoint slides are available for each chapter Sacha Bem Huib Looren de Jong's textbook remains essential for students taking courses in conceptual and historical issues in psychology the philosophy of psychology or theoretical psychology **Neuronal Bases and Psychological Aspects of Consciousness** Cloe Taddei-Ferretti, 1999 For a few decades the puzzle of consciousness which for centuries was analysed by philosophers has been finding a wide interest in the scientific field where previously it was not entitled to be a member It has become one of the most debated problems in the cognitive sciences The anatomical bases neurophysiological correlates and elementary mechanisms underlying complex processes arising with consciousness have been compared with the psychological perceptive cognitive volitive emotional aspects of conscious expressions in normal and pathological conditions Various theories which attempt to fit systematically and coherently neural and psychological data have been debated proving the emergence of the phenomenon of consciousness Evolutionary Psychology Neil Levy, 2017-03-02 Evolutionary approaches to the study of human beings have been able to explain the origin and maintenance of many of the features of our bodies Many thinkers believe that an evolutionary approach will be equally fruitful when it comes to explaining the features of our minds Since our behaviour is driven by our minds our cognitive dispositions and processes are likely to have been a target of selection and adaptation This volume collects recent prominent explorations of this theme as well as the voices of dissenters who argue that our minds are far more significantly the product of culture than of evolution
