Summary of Anthony Weston's A Rulebook for Arguments Everest Media, 2022-05-04T22:59:00Z Please note This is a companion version not the original book Sample Book Insights 1 The first step in making an argument is to ask yourself what you are trying to prove Your conclusion is the statement for which you are giving reasons The statements that give your reasons are your premises 2 Arguments are like any other form of movement They may be graceful or clumsy sharp or confused clean or muddled You want clarity and efficiency even grace if you can manage it 3 The premise of an argument is the statement that is being argued for It is important to make sure that your premises are strong since they will be the foundation of your conclusion If you are not sure about the reliability of a premise you may need to do some research and or give an argument for the premise itself 4 Do not use emotionally loaded words to describe your own side If you can't understand how someone could hold the view you are criticizing it is probably because you don't understand it yet
