Those who understand this and can analyse its context and content have the power to influence key decision making processes. Philip O'Regan's authoritative and important textbook provides readers with the tools and techniques to analyse accounting information and present it in a manner that is clear, focused and valuable. Updated to reflect changes in IFRS governance codes and regulatory frameworks as well as new sustainability reporting rules, the text sheds light on the role of accounting information in modern society and the many ways in which it can be used by a variety of stakeholders including shareholders, investors, employees, environmentalists and others. For readers across the UK, Ireland and continental Europe, this new edition is completely updated to incorporate relevant accounting standards, sustainability, ESG regulations and advanced analytical techniques. Features which add unique value to this fourth edition of *Financial Information Analysis* include case studies in every chapter with numerous supporting articles from the major financial presses, questions for review and comprehensive online support and materials. Confirming Dividend Changes and the Non-Monotonic Investor Revision of Earnings Persistence Christian Müller, 2013-12-30 The stylized facts that firms pay and investors react to dividends disregard dividend neutrality. Taking on the perspective that informational asymmetries are the central determinant for dividend value relevance, Christian Müller assumes that a firm's dividend decision conveys useful information to investors. He shows that investors use dividend changes to revise their a priori expectations about the persistence of a current earnings change. While his theoretical and empirical analyses generally imply that dividend changes constitute informative but imperfect information signals, he further identifies situations in which they are substantial to investors. Christian Müller's research comprehensively examines the informational role of dividend policy and provides new insights to the corresponding Bayesian investor learning process.
