Applied Spirituality: Seeing Through the Illusion of Our Separateness Robert Colacurcio, 2015-10-14 This volume is a compilation of six smaller books that were published between 2012 and 2014 They were written as though I were taking dictation Some higher power unlocked the gates of inspiration and articulation and I wrote almost continuously for three hours every day without ever first composing an outline for any of these books Instead of coming out as gibberish they form a coherent and I feel cogent whole and so I have grouped them together in one volume Performance excellence in any field requires among other things a clear goal that can be methodically approached incrementally in manageable steps and stages Without a clear goal there can be no cogent methodology Accomplishment in the practice of a spiritual discipline that leads to excellent results is no different Together these books offer a clear goal and method for accomplishing what I feel is the universal target of every valid form of spiritual practice namely seeing through the illusion of our separateness This goal is universal to every form of spiritual aspiration The methods outlined in this book therefore bypass every form of sectarianism They can be applied and practiced by anyone of any faith who is sincerely motivated to deepen in the spirit that unites us all

A Tapestry of African Histories Nicholas K. Githuku, 2021-10-18 In A Tapestry of African Histories With Longer Times and Wider Geopolitics contributors demonstrate that African historians are neither comfortable nor content with studying continental or global geopolitical social and economic events across the superficial divide of time as if they were disparate or disconnected Instead the chapters within the volume reevaluate African history through a geopolitically transcendent lens that brings

African countries into conversation with other pertinent histories both within and outside of the continent The collection analyzes the pre and post colonial eras within African countries such as Kenya Malawi and Sudan examining major historical figures and events struggles for independence and stability contemporary urban settlements social and economic development as well as constitutional legal and human rights issues that began in the colonial era and persist to this day

Religion, Spirituality and Healthcare Peter Roche de Coppens,2007-05-16 The present work constitutes the most important work written by Dr Roche de Coppens during his long career as an author In it he has brought together his deepest and longest lasting interests religion spirituality and healthcare in a new theoretical perspective that sheds much light on each of these disciplines and which relates them in an evolutionary perspective Many of the conflicts oppositions paradoxes and contradictions that pitted various approaches within each field and between these fields are now explained and integrated Thus allopathy psychosomatic integrative and spiritual medicine can now be reconciled as can religion spirituality rationalism materialism and the New Age The key is the level of consciousness and being of the involved person It is only at the 5th level of consciousness and being that one can reconcile these and bring one in addition to the others rather than having to choose between one or the other Etude Music Magazine Theodore Presser,1907 Includes music

Innovation in Organizations Michael West,Wieby M. Altink,1996 Two factors have focused the attention of policy makers researchers and senior managers upon the importance of innovation First the increasingly competitive global organizational environment requires that new and improved products processes and procedures are constantly developed Secondly there is widespread recognition that we must use our limited resources in the most efficient and effective way possible This special issue focuses on innovation in organizations in recognition of the primary strategic value of innovation in a rapidly changing European and global market place Psychological perspectives on innovation are particularly important since innovation ultimately is about human behaviour In this book contributors discuss the factors which contribute to individual innovation at work people introducing new and improved role objectives work processes and strategies They also examine factors influencing team level innovation an important area of research in the drive to understand how employees can become involved committed and empowered within organizations The contributors examine factors associated with organizational innovation an area where there is still much prescription but little empirical evidence Finally there is an examination of the

socio cultural factors affecting innovation All the contributors adopt a psychological perspective arguing that it is psychological factors which influence people to develop and introduce new and improved products processes and procedures in their workplaces The contributors who are drawn from a number of European countries exemplify the axiom that heterogeneity is associated with innovation The contents of this book themselves reflect innovative orientations to understanding innovation in organizations Of particular significance is that this book includes contributions from both researchers and practitioners and reveals both the overlaps in their conceptions of innovation at work as well as the areas of disagreement and discrepancy
