Applied Longitudinal Data Analysis Judith D. Singer, John B. Willett, 2003-03-27 Change is constant in everyday life Infants crawl and then walk children learn to read and write teenagers mature in myriad ways the elderly become frail and forgetful Beyond these natural processes and events external forces and interventions instigate and disrupt change test scores may rise after a coaching course drug abusers may remain abstinent after residential treatment By charting changes over time and investigating whether and when events occur researchers reveal the temporal rhythms of our lives Applied Longitudinal Data Analysis is a much needed professional book for empirical researchers and graduate students in the behavioral social and biomedical sciences It offers the first accessible in depth presentation of two of today's most popular statistical methods multilevel models for individual change and hazard survival models for event occurrence in both discrete and continuous time Using clear concise prose and real data sets from published studies the authors take you step by step through complete analyses from simple exploratory displays that reveal underlying patterns through sophisticated specifications of complex statistical models Applied Longitudinal Data Analysis offers readers a private consultation session

with internationally recognized experts and represents a unique contribution to the literature on quantitative empirical methods Visit <http://www.ats.ucla.edu/stat/examples/alda.htm> for Downloadable data sets Library of computer programs in SAS SPSS Stata HLM MLwiN and more Additional material for data analysis **Applied Longitudinal Data Analysis for Epidemiology** Jos W. R. Twisk, 2003-03-27 In this book the most important techniques available for longitudinal data analysis are discussed This discussion includes simple techniques such as the paired t test and summary statistics but also more sophisticated techniques such as generalised estimating equations and random coefficient analysis A distinction is made between longitudinal analysis with continuous dichotomous and categorical outcome variables It should be stressed that the emphasis of the discussion lies on the interpretation of the different techniques and on the comparison of the results of different techniques Furthermore special chapters will deal with the analysis of two measurements experimental studies and the problem of missing data in longitudinal studies Finally an extensive overview of and a comparison between different software packages is provided It is important to realise that this book is a practical guide and especially suitable for non statisticians **Applied Longitudinal Analysis** Garret M.
