Archaeological Chemistry III Joseph B. Lambert, 1984-01-01 *Ancient Technologies and Archaeological Materials*
Sarah U. Wissemann, Wendell S. Williams, 2013-11-26 First Published in 1993 This book is a user friendly introduction to the interface between archaeology and the natural sciences It is intended as a secondary textbook for undergraduates in interdisciplinary courses in anthropology archaeological science museum studies or materials science This title will also be useful to graduate students taking a course outside their major field and to archaeologists curators and scientists in a variety of settings who are engaged in interdisciplinary research Each chapter includes references and suggested readings a glossary of technical terms concludes the volume New Directions in Archaeological Science Andrew S. Fairbairn, Sue O'Connor, Benjamin Marwick, 2009-02-01 Archaeological Science meetings will have a personality of their own depending on the focus of the host archaeological fraternity itself The 8th Australasian Archaeometry meeting follows this pattern but underlying the regional emphasis is the continuing concern for the processes of change in the landscape that simultaneously effect and illuminate the archaeological record These are universal themes for any archaeological research with the increasing employment of science based studies proving to be a key to understanding the place of humans as subjects and agents of change over time This collection of refereed papers covers the thematic fields of geoarchaeology archaeobotany materials analysis and chronometry with particular emphasis on the first two The editors Andrew Fairbairn Sue O Connor and Ben Marwick outline the special value of these contributions in the introduction The international nature of archaeological science will mean that the advances set out in these papers will find a receptive audience among many archaeologists elsewhere There is no doubt that the story that Australasian archaeology has to tell has been copiously enriched by incorporating a widening net of advanced science based studies This has brought attention to the nature of the environment as a human artefact a fact now more widely appreciated and archaeology deals with these artefacts among others in this way in this publication Sepphoris II Eric C. Lapp, 2016-02-08 Sepphoris was an important Galilean site from Hellenistic to early Islamic times This multicultural city is described by Flavius Josephus as the ornament of all Galilee and Rabbi Judah the Prince ha Nasi codified the Mishnah there around 200 CE The Duke University excavations of the 1980s and 1990s uncovered a large corpus of clay oil lamps in the domestic area of the western summit and this volume presents these vessels Richly illustrated with photos and drawings it describes the various shape types and includes a detailed catalog of 219 lamps The volume also explores the origins of the Sepphoris lamps and establishes patterns of their trade transport and sale in the lower city s marketplace A unique contribution is the use of a combined petrographic and direct current plasma optical emission spectrometric dcp oes analysis of selected lamp fabrics from sites in Israel and Jordan This process provided valuable information indicating that lamps found in Sepphoris came from Judea the Decapolis and even Greece suggesting an urban community fully engaged with other regional centers Lamp decorations also provide information about the

cosmopolitan culture of Sepphoris in antiquity Discus lamps with erotic scenes and mythological characters suggest Greco Roman influences and menorahs portrayed on lamps indicate a vibrant Jewish identity
