Hornik, Mikeal Carl

Parsons, 2003 Since the iconoclastic controversies of the eighth and ninth centuries the visual arts have been the subject of much ecclesiastical discussion and contention In particular since the mid 1960s Protestant scholars and clergy have been paying more attention to the potential role of the visual arts in theology and liturgy of the Christian Church As a result numerous programs were begun under a variety of nomenclature e g Religion and the Arts Theology and the Arts etc Most of the essays in this book were originally presented as part of the Pruitt Symposium on Interpreting Christian Art held at Baylor University in October 2000 The symposium provided the opportunity to bring together scholars clergy and laity who are interested in the question of how religious art can contribute to the life of the contemporary Christian community The resulting essays are a rich fare in interdisciplinary exploration of Christian art by art historians theologians and biblical scholars Essayists include Margaret Miles Robin M Jensen Graydon F Snyder Charles Barber Anthony Cutler William M Jensen Paolo Berdini John W Cook and the editors Heidi J Hornik and Mikeal C Parsons *Architectural Theory* Bernd

approached to architectural history and more generally as examples of the kind of evidence used in the formation of architectural histories while also offering a thematic introduction to architecture in Britain and its social and cultural meaning

Aesthetic Theory Across the Disciplines Max Rynnänen, Zoltán Somhegyi, 2023-11-13 What is aesthetics How is it related to other disciplines The chapters of this book examine the history theoretical conditions and connection points between aesthetics and other disciplines At the same time the authors are also interested in practical clashes of methodology and agenda especially when it is not merely about the securing of the position of one or the other discipline but is used in a dialogical manner as the form of understanding better the nature of both as well as the benefits of their collaboration The authors work on the border of aesthetics and at least one other academic field Through their regular scholarly activities the contributors constantly benefit from cross and interdisciplinary practice and this makes them ideal interpreters of these methodological questions Contributors include Mami Aota Karl Axelsson Paul Duncum Lisa Giombini Oiva Kuisma Jacob Lund Tyrus Miller Max Rynnänen Mateusz Salwa Zoltán Somhegyi Wendy Steiner and Joseph Tanke

On the Aesthetics of Architecture Ralf Weber, 2024-11-07 Originally published in 1995 as part of the Ethnoscapes Current Challenges in the Environmental Social Sciences series reissued now with a new series introduction On the Aesthetics of Architecture is a result of an interdisciplinary study in architectural theory psychology and philosophy and the author's experience as a practicing architect It tries to relate theories of aesthetics and recent advances in the psychology of visual perception to the practice of design The text starts with an analysis of traditional and contemporary schools of thought in architectural theory and then proceeds through the formulation of a general theory of aesthetics based on perceptual and cognitive information processing to a description of the actual conditions under which aesthetic experiences of buildings and cities take place It exemplifies principles of aesthetic appropriateness through an analysis of architectural space and form Weber's book attempts to move the discussion of architectural aesthetics beyond the shifting doctrines of style and the often ambiguous dicta of critics While the author makes no claim that his interpretation of psychological research will result in good architecture he does insist on the need to bring the discussion of form back to more objective grounds As such it provided a valuable teaching resource and an important new contribution to the discussion among architects themselves as well as between psychologists philosophers and art theorists at the time
