

A photograph of a large industrial facility, likely a petroleum refinery, at night. The scene is illuminated by artificial lights, showing various structures, pipes, and storage tanks. In the background, several tall smokestacks are visible against a dark sky. The overall atmosphere is industrial and somewhat dramatic due to the lighting.

Geodynamic Evolution of the Indian Shield: Geophysical Aspects Om Prakash Pandey, 2020-04-28 This book addresses time bound geotectonic evolution of the various geological terrains of the Indian continent on the basis of integrated geophysical studies like seismic seismological gravity magnetic magnetotelluric and heat flow carried out over the past five decades Further it discusses elastic and petrophysical properties of the Earth s crust relevant to geological investigations The book also shares latest findings on the geodynamic development of the Indian shield and nearby continental margins including Arabian Sea Natural Hazards Ramesh Singh, Darius Bartlett, 2018-03-22 Over the years the interactions between land ocean biosphere and atmosphere have increased mainly due to population growth and anthropogenic activities which have impacted the climate and weather conditions at local regional and global scales Thus natural hazards related to climate changes have significantly impacted human life and health on different spatio temporal scales and with socioeconomic bearings To monitor and analyze natural hazards satellite data have been widely used in recent years by many developed and developing countries In an effort to better understand and characterize the various underlying processes influencing natural hazards and to carry out related impact assessments *Natural Hazards Earthquakes Volcanoes and Landslides* presents a synthesis of what leading scientists and other professionals know about the impacts and the challenges when coping with climate change Combining reviews of theories and methods with analysis of case studies the book gives readers research information and analyses on satellite geophysical data radar imaging and integrated approaches It focuses also on dust storms coastal subsidence and remote sensing mapping Some case studies explore the roles of remote sensing related to landslides and volcanoes Overall improved understanding of the processes leading to these hazardous events will help scientists predict their occurrence Features Provides information on the physics and physical processes of natural hazards their monitoring and the mapping of damages associated with these hazards Explains how natural hazards are strongly associated with coupling between land ocean atmosphere Includes a comprehensive overview of the role of remote

sensing in natural hazards worldwide Examines risk assessment in urban areas through numerical modelling and geoinformation technologies Demonstrates how data analysis can be used to aid in prediction and management of natural hazards

CHEMICAL PROCESS TECHNOLOGY AND SIMULATION KOYIKKAL, SRIKUMAR, 2013-04-08 This book is designed to apprise the students of chemical engineering with a variety of different processes of chemical technologies The book is richly illustrated and covers the essential information with the help of flow diagrams enabling the students to gain a full understanding of both the fundamental concepts and chemical reactions involved in process technologies Newer technologies have been dealt with and some technologies which have lost their relevance have been omitted Computer simulation methods have been described for many important technologies In short the book considers computer design tools and design software in a manner that integrates this knowledge smoothly into the main subject The book is expected to become useful not only to the students for courses in Chemical Technology but also to practising engineers and process designers for innovative process development There are topics on natural products and fermentation process chemicals organic chemicals inorganic chemicals refinery operations oil and gas operations and nanotechnology products In some of these topics computer simulation and costing examples are included An illustration of modelling and simulation using C is also given as an example of user written programs for simulation Another method that can be used for simulation is the use of spreadsheets which is also described with the help of an example A new important topic of today being polysilicon used in the manufacture of computer chips and solar panels is also covered in detail
