Mary E. Williams

A Mind Of My Own Memoir Of Recovery From Aphasia:

A Mind of My Own Harrienne Mills, 2004-11-02 *A Mind of My Own* is a dramatic true story of one woman's recovery from traumatic brain damage following a motorcycle accident in Greece. Facing far more than broken bones and physical impairments, this classical antiquity professor had lost what was most important to her: her ability to successfully use language. This insightful and moving memoir begins with her awakening from a coma and not recognizing family members and follows her journey of recovery. Using journal entries, medical records, letters, and more, she tells her story from multiple perspectives. In a process reminiscent of the literary ascent in *Flowers for Algernon*, her journal entries illustrate her remarkable journey and provide an intimate narrative of what it takes to become a whole person again after severe brain damage. Her successful step by step struggle to return to a normal life is a reminder of what the human spirit is capable of.

Narrative-Based Practice in Speech-Language Pathology Jacqueline H. Hinckley, 2007-07-02 **Neurogenic Communication Disorders: Life Stories and the Narrative Self** Plural Publishing, Incorporated, 2008-07 There is currently considerable focus on psychosocial issues for persons with aphasia and their significant others. However, there has been little unifying work that brings diverse interdisciplinary perspectives together to understand the impact of aphasia and other neurogenic communication disorders on the social construction and mediation of self or identity. In this book, the authors explore this idea of social construction of self as it relates to the human need to create, share, and modify life stories, particularly when confronting major life changes. Their premise is that impaired communication can have a profound impact on one's perception of self and one's ability to negotiate the social reconstruction of self in the context of a neurological disorder. The nature and extent of impact varies as seen in the book's in-depth examination of narrative self for persons living with aphasia, ALS, Parkinson's disease, and dementia, as well as those aging without impairment. The authors present theoretical grounding for using the concepts of self and the idea of a social and cultural tool kit that enables clients to interact with others and to define themselves in the context of those around them. The text moves from theory to qualitative analyses of living with neurogenic disorders to implications for clinical interventions for individual clients and their significant others.

Speech Disorders Mary E. Williams, 2012-06-12 40 million Americans have communication disorders. Your readers are provided with essential information on speech disorders. This book also serves as a historical survey by providing information on the controversies surrounding its causes. Compelling first-person narratives by people coping with speech disorders give readers a first-hand experience. Patients, family members, or caregivers explain the condition from their own experience. The symptoms, causes, treatments, and potential cures are explained in detail. Essential to anyone trying to learn about diseases and conditions, the alternative treatments are explored. Each essay is carefully edited and presented with an introduction so that they are accessible for student researchers and readers.
