A New Divide Science Fiction:

The New Routledge Companion to Science Fiction Mark Bould, Andrew M. Butler, Sherryl Vint, 2024-06-13 The New Routledge Companion to Science Fiction provides an overview of the study of science fiction across multiple academic fields. It offers a new conceptualisation of the field today marking the significant changes that have taken place in sf studies over the past 15 years. Building on the pioneering research in the first edition, the collection reorganises historical coverage of the genre to emphasise new geographical areas of cultural production and the growing importance of media beyond print. It also updates and expands the range of frameworks that are relevant to the study of science fiction. The periodisation has been reframed to include new chapters focusing on science fiction produced outside the Anglophone context including South Asian, Latin American, Chinese and African diasporic science fiction. The contributors use both well established critical and theoretical approaches and embrace a range of new ones including biopolitics, climate crisis, critical ethnic studies, disability studies, energy humanities, game studies, medical humanities, new materialisms and sonic studies. This book is an invaluable resource for students and established scholars seeking to understand the vast range of engagements with science fiction in scholarship today. Chapter 39 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license. Technology and Social Space John Macgregor Wise, 1997-09-03 This volume offers a critical philosophical and epistemological framework to understand better our relations to technology and social space. John MacGregor Wise focuses on the burgeoning technological assemblage of communication and information characterized by the Internet and cyberspace, draws on the philosophy of Deleuze and Guattari and the actor network sociology of Latour and brings together diverse examples from cyborg films, television, museums, cyberspace and debates over a new world information and communication order. In the last chapter, the possibilities and limitations of human agency within the new wired world are described.

Science Fiction in Classic Rock Robert McParland, 2017-11-29 As technology advances, society retains its mythical roots, a tendency evident in rock music and its enduring relationship with myth and science fiction. This study explores the mythical and fantastic themes of artists from the late 1960s to the mid 1980s, including David Bowie, Pink Floyd, Jefferson Airplane, Blue Oyster Cult, Iron Maiden, Led Zeppelin and Black Sabbath. Drawing on insights from Joseph Campbell, J. G. Frazer, Carl Jung and Mircea Eliade, the author examines how performers have incorporated mythic archetypes and science fiction imagery into songs that illustrate societal concerns and futuristic fantasies. *The Year's Best Science Fiction: Twenty-Eighth Annual Collection* Gardner Dozois, 2011-07-05 Contains thirty-three short stories chosen by the editor as the best in science fiction for 2010, including selections by Damien Broderick, Steven Popkes, Rachel Swirsky and others, and features a summation of the year's events as well as a list of honorable mentions. *SCIENCE FICTION Ultimate Box Set: 170+ Dystopian Novels, Space Adventures, Lost World Classics & Apocalyptic Tales* Jules Verne, Mark Twain, Robert Louis Stevenson, James Fenimore
