A Safe And Sustainable World The Promise Of Ecological Design:

A Safe and Sustainable World Nancy Jack Todd, 2012-07-16 In the late sixties as the world was waking to a need for Earth Day a pioneering group founded a small non profit research and education organization they called the New Alchemy Institute Their aim was to explore the ways a safer and more sustainable world could be created In the ensuing years along with scientists agriculturists and a host of enthusiastic amateurs and friends they set out to discover new ways that basic human needs in the form of food shelter and energy could be met A Safe and Sustainable World is the story of that journey as it was and as it continues to be The dynamics and the resilience of the living world were the Institute s model and the inspiration for their research Central to their efforts then and now is along with science a spiritual quest for a more harmonious human role in our planet s future The results of this work have now entered mainstream science through the emerging discipline of ecological design Nancy Jack Todd not only relates a fascinating journey from lofty ideals through the hard realities encountered in learning how to actually grow food harness the energy of the sun and wind and design green architecture She also introduces us to some of the heroes and mentors who played a vital role in those efforts as well from Buckminster Fuller to Margaret Mead The early work of the Institute culminated in the design and building of two bioshelters large greenhouse like independent structures called Arks that provided the setting for much of the research to follow Successfully proving through the Institute s designs and investigations that basic land sustainability is achievable John Todd and the author founded a second non profit research group Ocean Arks International Here they applied the New Alchemy s natural systems thinking to restoring polluted waters with the invention and implementation of biologically based living technologies called Ecomachines and Pond and Lake Restorers A Safe and Sustainable World demonstrates what has and can be done it also looks to what must be done to integrate human ingenuity and the four billion or so years of evolutionary intelligence of the natural world into healthy decentralized locally dreams hard won and hope **Restoring**

the Soul of the World David Fideler, 2014-11-20 Humanity s creative role within the living pattern of nature Explores important scientific discoveries that reveal the self organizing intelligence at the heart of nature Examines the idea of a living cosmos from its roots in the earliest cultures to its eclipse during the Scientific Revolution to its return today Reveals ways to reengage our creative partnership with nature and collaborate with nature s intelligence For millennia the world was seen as a creative interconnected web of life constantly growing developing and restoring itself But with the arrival of the Scientific Revolution in the 16th and 17th centuries the world was viewed as a lifeless clock like mechanism bound by the laws of classical physics Intelligence was a trait ascribed solely to human beings and thus humanity was viewed as superior to and separate from nature Today new scientific discoveries are reviving the ancient philosophy of a living interconnected cosmos and humanity is learning from and collaborating with nature s intelligence in new life enhancing ways from ecological design to biomimicry Drawing upon the most important scientific discoveries of recent times David Fideler explores the self

organizing intelligence at the heart of nature and humanity's place in the cosmic pattern. He examines the ancient vision of the living cosmos from its roots in the world soul of the Greeks and the alchemical tradition to its eclipse during the Scientific Revolution to its return today. He explains how the mechanistic worldview led to humanity's profound sense of alienation for if the universe only functioned as a machine there was no longer any room for genuine creativity or spontaneity. He shows how this isn't the case and how even at the molecular level natural systems engage in self-organization, self-preservation, and creative problem-solving, mirroring the ancient idea of a creative intelligence that exists deep within the heart of nature. Revealing new connections between science, religion, and culture, Fidler explores how to reengage our creative partnership with nature and new ways to collaborate with nature's intelligence.

Dreamers, Visionaries, and Revolutionaries in the Life Sciences Oren Harman, Michael R. Dietrich, 2018-07-20 What are the conditions that foster true novelty and allow visionaries to set their eyes on unknown horizons? What have been the challenges that have spawned new innovations and how have they shaped modern biology? In *Dreamers, Visionaries, and Revolutionaries in the Life Sciences*, editors Oren Harman and Michael R. Dietrich explore these questions through the lives of eighteen exemplary biologists who had grand and often radical ideas that went far beyond the run of the mill science of their peers. From the Frenchman Jean Baptiste Lamarck who coined the word biology in the early nineteenth century to the American James Lovelock for whom the Earth is a living breathing organism, these dreamers innovated in ways that forced their contemporaries to reexamine comfortable truths. With this collection, readers will follow Jane Goodall into the hidden world of apes in African jungles and Francis Crick as he attacks the problem of consciousness. Join Mary Lasker on her campaign to conquer cancer and follow geneticist George Church as he dreams of bringing back woolly mammoths and Neanderthals. In these lives and the many others featured in these pages, we discover visions that were sometimes fantastical, quixotic, and even threatening and destabilizing, but always a challenge to the status quo.

Green Andrew G. Kirk, 2007-11-19 For those who eagerly awaited its periodic appearance it was more than a publication it was a way of life The Whole Earth Catalog billed itself as Access to Tools and it grew from a Bay Area blip to a national phenomenon catering to hippies do it yourselfers and anyone interested in self sufficiency independent of mainstream America In recovering the history of the Catalog s unique brand of environmentalism Andrew Kirk recounts how San Francisco s Stewart Brand and his counterculture cohorts in the Point Foundation promoted a philosophy of pragmatic environmentalism that celebrated technological achievement human ingenuity and sustainable living By piecing together the social cultural material environmental and technological history of that philosophy s incarnation in the Catalog Kirk reveals the driving forces behind it tells the story of the appropriate technology movement it espoused and assesses its fate This book takes a fresh look at the many individuals and organizations who worked in the 1950s 1960s and 1970s to construct this philosophy of pragmatic environmentalism At a time when many of these ideas were seen as heretical to a predominantly wilderness based movement Whole Earth became a critical forum for environmental alternatives and a model for how complicated ecological ideas could be presented in a hopeful and even humorous way It also enabled later environmental advocates like Al Gore to explain our current inconvenient truth and the actions of Brand s Point Foundation demonstrated that the epistemology of Whole Earth could be put into action in meaningful ways that might foster an environmental optimism distinctly different from the jeremiads that became the stock in trade of American environmentalism Kirk shows us that Whole Earth was more than a mere counterculture fad In an era of political protest it suggested that staying home and modifying your toilet or installing a solar collector could make a more significant contribution than taking to the streets to

shout down establishment misdeeds Given its visible legacy in the current views of Al Gore and others the subtle environmental heresies of Whole Earth continue to resonate today which makes Kirk s lucid and lively tale an extremely timely one as well Deep Design Thinking Mike Baxter,Seaton Baxter,2024-07-14 This book is a manifesto urging deeper thought about what we design as well as how and why we design As design thinking deepens its reach widens making this a book not just for designers but also for policymakers government ministers company CEOs and other makers of big decisions The world we live in presents a myriad of complex critical challenges which design thinking has the potential to resolve The hope in writing this book is that when future generations look back and reflect on how we succeeded in steering away from our climate warming species killing polluting habits of the past towards a more productive life fulfilling and equitable future they might see the hand of deep design thinking on the tiller Seaton and Mike Baxter are father and son who have both been Professors of Design and have contributed over several decades between them to the fields of ecological design product design and strategy design This book is the result of many years of discussions between them on the nature of design and the ideas and practicalities that lead to deep design thinking
