

4. Align the replacement display adhesive over the enclosure with the grounding foam on top. Ensure that the top holes of the adhesive align over the TrueDepth camera assembly.

**Caution**

Ensure that you've removed all adhesive residue from the display and the enclosure before you apply the replacement display adhesive.

5. The replacement display adhesive has a top release liner, a middle release liner, and a bottom release liner. Grasp the tab on the bottom release liner. Then slowly pull the bottom release liner (1) out from under the adhesive (2) out from under the enclosure.

**Important**

Don't remove the top release liner yet.

The Internet Con Cory Doctorow, 2023-09-05 When the tech platforms promised a future of connection they were lying They said their walled gardens would keep us safe but those were prison walls The platforms locked us into their systems and made us easy pickings ripe for extortion Twitter Facebook and other Big Tech platforms hard to leave by design They hold hostage the people we love the communities that matter to us the audiences and customers we rely on The impossibility of staying connected to these people after you delete your account has nothing to do with technological limitations it's a business strategy in service to commodifying your personal life and relationships We can we must dismantle the tech platforms In *The Internet Con* Cory Doctorow explains how to seize the means of computation by forcing Silicon Valley to do the thing it fears most interoperate Interoperability will tear down the walls between technologies allowing users leave platforms remix their media and reconfigure their devices without corporate permission Interoperability is the only route to the rapid and enduring annihilation of the platforms *The Internet Con* is the disassembly manual we need to take back our internet

Power Metal Vince Beiser, 2024-11-19 The powerful ways the metals we need to fuel technology and energy are spawning environmental havoc political upheaval and rising violence and how we can do better An Australian millionaire's plan to mine the ocean floor Nigerian garbage pickers risking their lives to salvage e waste A Bill Gates backed entrepreneur harnessing AI to find metals in the Arctic These people and millions more are part of the intensifying competition to find and extract the minerals essential for two crucial technologies the internet and renewable

energy In Power Metal Vince Beiser explores the Achilles heel of green power and digital technology that manufacturing computers cell phones electric cars and other technologies demand skyrocketing amounts of lithium copper cobalt and other materials Around the world businesses and governments are scrambling for new places and new ways to get those metals at enormous cost to people and the planet Beiser crisscrossed the world to talk to the people involved and report on the damage this race is inflicting the ways it could get worse and how we can minimize the damage Power Metal is a compelling glimpse into this disturbing yet potentially promising new world The Innovation Delusion Lee Vinsel, Andrew L.

Russell, 2020-09-08 Innovation is the hottest buzzword in business But what if our obsession with finding the next big thing has distracted us from the work that matters most The most important book I've read in a long time It explains so much about what is wrong with our technology our economy and the world and gives a simple recipe for how to fix it Focus on understanding what it takes for your products and services to last Tim O'Reilly founder of O'Reilly Media It's hard to avoid innovation these days Nearly every product gets marketed as being disruptive whether it's genuinely a new invention or just a new toothbrush But in this manifesto on the state of American work historians of technology Lee Vinsel and Andrew L. Russell argue that our way of thinking about and pursuing innovation has made us poorer less safe and ironically less innovative Drawing on years of original research and reporting The Innovation Delusion shows how the ideology of change for its own sake has proved a disaster Corporations have spent millions hiring chief innovation officers while their core businesses tank Computer science programs have drilled their students on programming and design even though the overwhelming majority of jobs are in IT and maintenance In countless cities suburban sprawl has left local governments with loads of deferred repairs that they can't afford to fix And sometimes innovation even kills like in 2018 when a Miami bridge hailed for its innovative design collapsed onto a highway and killed six people In this provocative deeply researched book Vinsel and Russell tell the story of how we devalued the work that underpins modern life and in doing so wrecked our economy and public infrastructure while lining the pockets of consultants who combine the ego of Silicon Valley with the worst of Wall Street's greed The authors offer a compelling plan for how we can shift our focus away from the pursuit of growth at all costs and back toward neglected activities like maintenance care and upkeep For anyone concerned by the crumbling state of our roads and bridges or the direction our economy is headed The Innovation Delusion is a deeply necessary reevaluation of a trend we can still disrupt The Complete Idiot's Guide to Mac OS X Kate Binder, 2001 A guide to Mac computing essentials showcases the updated features of OS X covering installation integration applications networking and troubleshooting

Circular Economy Opportunities and Pathways for Manufacturers Henrik Hvid Jensen, 2025-03-11 In today's rapidly evolving manufacturing landscape the future competitiveness for manufacturers hinges on three interlinked paradigms 1 Circular Economy Models for Zero Waste Product Lifecycles The shift from traditional linear models to circular ones is increasingly crucial Circular strategies extend product lifecycles optimize resource use and
