develops a new methodological framework for measuring the efficiency of regional integration and the integration profile of member states. It includes rich case studies which offer a comparative analysis of ten integrations spanning four continents: The Americas, the European Union, Africa, and Asia. The *Economics of Regional Integration* shows the importance of regional economic integration in the world economy based partially on descriptive analyses. The authors' new methodological framework and a new composite index integration profile implement and quantify relevant theories, e.g., integration maturity, competitiveness, economic development, convergence to one framework, and a composite indicator. This helps to arrive at a more precise measurement of these integrations, resulting in useful feedback for decision makers and leading to policy recommendations for each organisation to improve efficiency or to include new members. The text presents a comparative perspective of regional integration based on case studies by applying the same theoretical framework and a comprehensive methodology for assessing the economic readiness of membership-seeking countries while also considering regional differences. It investigates the impact of regional integration on income inequality and poverty reduction by examining how common development economic policies and social programs implemented by regional organizations affect the distribution of income and wealth among member states. The comprehensive investigation of regional integration covering economic, social, and institutional factors makes the book highly relevant for advanced students, researchers, and scholars. Additionally, its potential policy context application makes it useful for policymakers and practitioners participating in regional integration programs.

The Globalization of Hate Jennifer Scheppe, Mark Austin Walters, 2016-05-26

The Globalisation of Hate: Internationalising Hate Crime is the first book to examine the impact of globalisation on our understanding of hate speech and hate crime. Bringing together internationally acclaimed scholars with researchers, policy makers, and practitioners from across the world, it critically scrutinises the concept of hate crime as a global phenomenon, seeking to examine whether hate crime can or should be conceptualised within an international framework and if so, how this might be achieved. Beginning with the global dynamics of hate, the contributions analyse whether hate crime can be defined globally, whether universal principles can be applied to the phenomenon, how hatred is spread, and how it impacts upon our global society. The middle portion of the book moves beyond the broader questions of globalisation to jurisdictional examples of how globalisation impacts upon our understanding of and also our responses to hate crime. The chapters explore in greater detail what is happening around the world and how the international concepts of hate crime are being operationalised locally, drawing out the themes of globalisation and internationalisation that are relevant to hate crime as evidenced by a number of jurisdictions from Europe, the US, Asia, and Africa. The final part of the book concludes with an examination of the different ways in which hate speech and hate crime is being combatted globally. International law, internet regulation, and the use of restorative practices are evaluated as methods of addressing hate-based conflict, with the discussions drawn from existing frameworks as well as exploring normative standards for future international efforts. Taken together, these innovative and

insightful contributions offer a timely investigation into the effects of hate crime offering an interdisciplinary approach to tackling what is now a global issue It will be of interest to scholars and students of criminology sociology and criminal justice as well as criminal justice practitioners police officers and policy makers 1 Test Test Test test *A History of the Present*
Ashwin Desai,Goolam Vahed,2019-09-12 Through the long 20th century Indian South Africans lived under the whip of settler colonialism and white minority rule which saw the passing of a slew of legislation that circumscribed their freedom of movement threatened repatriation and denied them citizenship all the while herding them into racially segregated townships This volume chronicles the broad outlines of this history Taking the story into the present it provides an analysis of how Indian South Africans have responded to changes wrought by the remarkable collapse of apartheid and the holding of the first democratic elections in 1994 Drawing upon archival records in depth interviews and ethnography this study examines the ways in which Indian South Africans define themselves and the world around them and how they are defined by others It tells of the incredible journey of Indian South Africans many of whom are fourth and fifth generation towards being recognized as citizens in the land of their birth and how while often attracted by and seeking to explore their roots in India they continue to dig deeper roots in African soil *eThekweni's Green and Ecological Infrastructure Policy Landscape*
Richard Meissner,2020-08-31 This book offers the reader a deeper understanding of the eThekweni Metropolitan Municipality's green and ecological infrastructure policy landscape The author utilises the PULSE3 analytical framework to conduct an in depth examination and to show how experts frame and implement the municipality's green and ecological infrastructure strategies and projects Although the initial purpose of this book was to investigate the role of green and ecological infrastructures in eThekweni's water security aspirations the author realised that climate change adaptation and mitigation play a more central role in motivating the municipality to develop and implement such science driven projects To be sure science that is informed by a positivist paradigm guides how where and when the municipality should develop green and ecological infrastructures Furthermore a positivistic stance is generated in this policy landscape where science and politics meet at a local government level and the book offers an insight into the science policy interface as well as the normative and value orientations that positivism often ignores The book also shows the usefulness of the PULSE3 framework and how it can assist scientists in all fields to gain a deeper understanding of the complications that are faced by humankind This book fills a market gap by providing a view of how scientists think about problems and how to solve them by using established paradigms and theories
