Interactions on Digital Tablets in the Context of 3D Geometry Learning David Bertolo, 2016-07-14 Over the last few years multi touch mobile devices have become increasingly common However very few applications in the context of 3D geometry learning can be found in app stores Manipulating a 3D scene with a 2D device is the main difficulty of such applications Throughout this book the author focuses on allowing young students to manipulate observe and modify 3D scenes using new technologies brought about by digital tablets Through a user centered approach the author proposes a grammar of interactions adapted to young learners and then evaluates acceptability ease of use and ease of learning of the interactions proposed Finally the author studies in situ the pedagogic benefits of the use of tablets with an app based on the suggested grammar The results show that students are able to manipulate observe and modify 3D scenes using an adapted set of interactions Moreover in the context of 3D geometry learning a significant contribution has been

observed in two classes when students use such an application The approach here focuses on interactions with digital tablets to increase learning rather than on technology First defining which interactions allow pupils to realize tasks needed in the learning process then evaluating the impact of these interactions on the learning process This is the first time that both interactions and the learning process have been taken into account at the same time **Decision-Making in Crisis**

Action in Uncertainty Jean-Charles Pomerol,2023-07-31 Despite uncertainty people are born to act Faced with environmental aggression and upheaval inaction is more stressful than action What choices strategies or methods need to be implemented so that action is as effective as possible in terms of the objectives to be achieved We should not delude ourselves about the term good decision which does not have much meaning when we act in an uncertain environment and when we know the weakness of forecasts However we must know how to act and be capable of taking the most appropriate action Action in Uncertainty is a real guide to taking effective action when nothing is certain According to the different types of uncertainty what are the respective good uses of expertise and intuition How do we motivate teams and avoid cognitive bias and manipulation These themes are dealt with in clear and accessible terms to help decision makers make the right choices in a world that is more uncertain than ever *The Image-Interface* Everardo Reyes-Garcia,2017-11-01 Digital practices are shaped by graphical representations that appear on the computer screen which is the principal surface for designing visualizing and interacting with digital information Before any digital image or graphical interface is rendered on the screen there is a series of layers that affect its visual properties To discover such processes it is necessary to investigate software applications graphical user interfaces programming languages and code algorithms data structures and data types
