Architectural, Energy and Information Engineering Wen-Pei Sung, Ran Chen, 2015-12-30 This proceedings volume brings together selected peer reviewed papers presented at the 2015 International Conference on Architectural Energy and Information Engineering AEIE 2015 held July 15 16 2015 in Hong Kong China The proceedings are divided into two parts Architectural Energy and Environmental Engineering and Information Engineering **Handbook of Research on Digital**

Research Methods and Architectural Tools in Urban Planning and Design Abusaada, Hisham, Vellguth, Carsten, Elshater, Abeer, 2019-06-28 The efficient usage investigation and promotion of new methods tools and technologies within the field of architecture particularly in urban planning and design is becoming more critical as innovation holds the key to cities becoming smarter and ultimately more sustainable In response to this need strategies that can potentially yield more realistic results are continually being sought The Handbook of Research on Digital Research Methods and Architectural Tools in Urban Planning and Design is a critical reference source that comprehensively covers the concepts and processes of more than 20 new methods in both planning and design in the field of architecture and aims to explain the ways for researchers to apply these methods in their works Pairing innovative approaches alongside traditional research methods the physical dimensions of traditional and new cities are addressed in addition to the non physical aspects and applied models that are currently under development in new settlements such as sustainable cities smart cities creative cities and intercultural cities Featuring a wide range of topics such as built environment urban morphology and city information modeling this book is essential for researchers academicians professionals technology developers architects engineers and policymakers **Proceedings of the 5th International Conference on Building Energy and Environment** Liangzhu Leon

Wang, Hua Ge, Zhiqiang John Zhai, Dahai Qi, Mohamed Ouf, Chanjuan Sun, Dengjia Wang, 2023-09-04 This book is a compilation of selected papers from the 5th International Conference on Building Energy and Environment COBEE2022 held in Montreal Canada in July 2022 The work focuses on the most recent technologies and knowledge of building energy and the environment including health energy urban microclimate smart cities safety etc The contents make valuable contributions to academic researchers engineers in the industry and regulators of buildings As well readers encounter new ideas for achieving healthy comfortable energy efficient resilient and safe buildings **BIM Teaching and Learning Handbook** M.

Reza Hosseini, Farzad Khosrowshahi, Ajibade Aibinu, Sepehr Abrishami, 2021-08-09 This book is the essential guide to the pedagogical and industry inspired considerations that must shape how BIM is taught and learned It will help academics and professional educators to develop programmes that meet the competences required by professional bodies and prepare both graduates and existing practitioners to advance the industry towards higher efficiency and quality To date systematic efforts to integrate pedagogical considerations into the way BIM is learned and taught remain non-existent This book lays the foundation for forming a benchmark around which such an effort is made It offers principles best practices and expected

outcomes necessary to BIM curriculum and teaching development for construction related programs across universities and professional training programmes The aim of the book is to Highlight BIM skill requirements threshold concepts and dimensions for practice Showcase and introduce tried and tested practices and lessons learned in developing BIM related curricula from leading educators Recognise and introduce the baseline requirements for BIM education from a pedagogical perspective Explore the challenges as well as remedial solutions pertaining to BIM education at tertiary education Form a comprehensive point of reference covering the essential concepts of BIM for students Promote and integrate pedagogical consideration into BIM education This book is essential reading for anyone involved in BIM education digital construction architecture and engineering and for professionals looking for guidance on what the industry expects when it comes to BIM competency

Proceedings of 7th International Conference on Harmony Search, Soft Computing and Applications Joong Hoon Kim,Kusum Deep,Zong Woo Geem,Ali Sadollah,Anupam Yadav,2022-09-01 The book covers different aspects of real world applications of optimization algorithms It provides insights from the Seventh International Conference on Harmony Search Soft Computing and Applications held at Virtual Conference Seoul South Korea in February 2022 Harmony search HS is one of the most popular metaheuristic algorithms developed in 2001 by Prof Joong Hoon Kim and Prof Zong Woo Geem that mimics the improvisation process of jazz musicians to seek the best harmony The book consists of research articles on novel and newly proposed optimization algorithms the theoretical study of nature inspired optimization algorithms numerically established results of nature inspired optimization algorithms and real world applications of optimization algorithms and synthetic benchmarking of optimization algorithms

Smart Energy in the Smart City Rocco Papa,Romano Fistola,2016-05-05 This book examines the energy dimension of the smart city from the perspective of urban planning providing a complete overview that ranges from theoretical aspects to practical considerations and projects In addition it aims to illustrate how the concept of the smart city can enhance understanding of the urban system and foster new forms of management of the metropolis including with respect to energy supply and use Specifically the book explores the different dimensions of the relationship between energy and the city discusses methodological issues with a special focus on ontological approaches to sustainability and describes practices tools and good examples of energy related urban planning The authors represent the main Italian research groups working in the field Italy being an excellent example of a country exposed to energy problems due to for example vulnerability to climate change and lack of primary energy resources This book will be valuable for students of urban planning town planners and researchers interested in understanding the changing nature of the city and the challenges posed by energy issues

Proceedings of the 4th International Conference on Advances in Communication Technology and Computer Engineering (ICACTCE'24) Celestine Iwendi,Zakaria Boulouard,Natalia Kryvinska,2025-07-11 This proceedings book offers a refined and comprehensive exploration of cutting edge advancements in communication networks computational intelligence and smart applications

seamlessly blending theoretical insights with practical solutions Each paper outlines objectives challenges proposed solutions and key findings enabling swift comprehension of complex topics By adopting a problem solving approach and including case studies the book effectively demonstrates the application of advanced techniques in domains such as industry healthcare and smart cities Addressing the demands of an evolving digital landscape it highlights emerging technologies like artificial intelligence AI the Internet of Things IoT and autonomous systems ensuring its relevance to both current challenges and future innovations Covering a wide spectrum of topics including network security AI applications IoT ecosystems and smart technologies the book serves as a comprehensive resource for understanding the innovations shaping the future of communication and computing Targeted at graduate students researchers professors and industry professionals it functions as both an educational tool and a reference guide for those seeking to remain at the forefront of technological advancements Featuring state of the art research contributions the book introduces new techniques algorithms and solutions to real world challenges complemented by structured insights into objectives problems and results Practical applications are brought to life through successful case studies in key areas like smart cities and healthcare illustrating the tangible impact of these innovations With contributions reviewed by a distinguished editorial team of leading researchers engineers and academics the book ensures credibility academic rigor and relevance By blending theoretical depth practical utility and expert validation this proceedings book is an indispensable resource for navigating the rapidly evolving fields of computing and communication technologies equipping readers with the knowledge and tools to excel in an increasingly digital and interconnected world
