Architecture Must Burn A Manifesto For An Architecture Beyond Building

Giovanni Corbellini

Architecture Must Burn A Manifesto For An Architecture Beyond Building:

Architecture Must Burn Aaron Betsky, Erik Adigard, 2000 This work presents a combative fusion of ideas and graphic design mixing contemporary theories on spatiality technology literature and art It contains 28 discussions revolving around the notion that architecture is an example of technology acting as a form of poetry **Architecture and Fire** Stamatis Zografos, 2019-06-12 Architecture and Fire develops a conceptual reassessment of architectural conservation through the study of the intimate relationship between architecture and fire Stamatis Zografos expands on the general agreement among many theorists that the primitive hut was erected around fire locating fire as the first memory of architecture at the very beginning of architectural evolution Following the introduction Zografos analyses the archive and the renewed interest in the study of archives through the psychoanalysis of Jacques Derrida He moves on to explore the ambivalent nature of fire employing the conflicting philosophies of Gaston Bachelard and Henri Bergson to do so before discussing architectural conservation and the relationship between listed buildings the function of archives and the preservation of memories from the past The following chapter investigates how architecture evolves by absorbing and accommodating fire while the penultimate chapter examines the critical moment of architectural evolution the destruction of buildings by fire with a focus on the tragic disaster at London's Grenfell Tower in 2017 Zografos concludes with thoughts on Freud's drive theory He argues the practice of architectural conservation is an expression of the life drive and a simultaneous repression of the death drive which suggests controlled destruction should be an integral part of the conservation agenda Architecture and Fire is founded in new interdisciplinary research navigating across the boundaries of architecture conservation archival theory classical mythology evolutionary theory thermodynamics philosophy and psychoanalysis It will be of interest to readers working in and around these disciplines **Sayable Space. Narrative Practices in Architecture** Giovanni

Corbellini, 2021-11-18 When a work reaches its maximum intensity wrote Le Corbusier a phenomenon of ineffable space occurs The ultimate quality of architecture would reside therefore in the resistance to its description However to tell us this and much more the Swiss master has published more than seventy books and his so compelling formula in supporting the ineffable also shows how words are able to grasp it This brief essay investigates the multiple intersections between discourse and design the way buildings try to talk with their own specific means how architects are trying to remain relevant without building the paradoxes of architecture description after its completion the modes of communication during the project processes the capacity of narrative to act before the project operations start and infiltrate the collective perception making possible innovative approaches **Executive Design of the Façade Systems** Ingrid Paoletti, Massimiliano

Nastri, 2023-09-25 The book examines the typological and technological constitution of the principal advanced façade systems in the contemporary design and experimental scenario proposing itself as a knowledge and operational tool currently lacking in the technical literature of the sector at an international level It considers the field of advanced façade systems in a

scientific way constituting a support for the study and the executive design The book investigates in detail in an analytical form the constitution of the components on a typological and geometrical functional and constructive level on the basis of the documents and knowledges acquired from the essential contemporary production and construction references At the same time the book is configured in a handbook form as a reference for understanding and application with respect to traditional and complex fa ade systems For each main type of fa ade the book provides explanations and scientific information for investigating and designing the advanced fa ades according to the characteristics of the Mullions and Transoms fa ade system stick system of the structural sealant glazing fa ade system of the unit fa ade system of the suspended fa ade system and of the double skin fa ade system

The Contradictions of Urban Art Ewa Rewers, 2013 This book examines the dynamics of artistic creativity that transgresses the boundaries of public art and it looks into the inventions expressed by the practical activities and academic research focused on contemporary urban spaces The Contradictions of Urban Art demonstrates how the multilingualism of art and science raises the temperature of discussions concerning the city It advises that what we call city art should include outdoor events prose and poetry Series Development in Humanities Vol 5

Distributed, Ambient, and Pervasive Interactions Norbert Streitz, Panos Markopoulos, 2014-05-17 This book constitutes the refereed proceedings of the Second International Conference on Distributed Ambient and Pervasive Interactions DAPI 2014 held as part of the 16th International Conference on Human Computer Interaction HCII 2014 held in Heraklion Crete Greece in June 2014 jointly with 13 other thematically conferences The total of 1476 papers and 220 posters presented at the HCII 2014 conferences were carefully reviewed and selected from 4766 submissions These papers address the latest research and development efforts and highlight the human aspects of design and use of computing systems The papers accepted for presentation thoroughly cover the entire field of Human Computer Interaction addressing major advances in knowledge and effective use of computers in a variety of application areas The 58 papers included in this volume are organized in topical sections on design frameworks and models for intelligent interactive environments natural interaction cognitive perceptual and emotional issues in ambient intelligence user experience in intelligent environments developing distributed pervasive and intelligent environments smart cities

The Good Building ; Pressing Style Kevin Alter, 2003

No More Rules Rick Poynor, 2003 With the international take up of new technology in the 1990s designers and typographers reassessed their roles and jettisoned existing rules in an explosion of creativity in graphic design This book tells that story in detail defining and illustrating key developments and themes from 1980 2000

Shopping Malls and Public Space in Modern China Nicholas Jewell, 2016-03-03 China's rise as an economic superpower has been inescapable Statistical hyperbole has been accompanied by a plethora of highly publicized architectural forms that brand the regeneration of its increasingly globalized urban centres Despite the sizeable body of literature that has accompanied China's modernization the essence and trajectory of its contemporary cityscape remains difficult to grasp This volume addresses a less explored aspect of China's urban

rejuvenation the prominence of the shopping mall as a keystone of its public spaces Here the presence of the built form most representative of Western capitalism s excess is one that makes explicit the tensions between China s Communist state and its ascent within the free market This book examines how these interrelationships are manifested in the culturally hybrid built form of the shopping mall and its role in contesting the public space of the modern Chinese city By viewing these interrelationships as collisions of global and local narratives a more nuanced understanding of the shopping mall typology is explored Much architectural criticism has failed to address the levels of meaning implicit within the shopping mall yet it is a building type whose public popularity has guaranteed its endurance Consequently if architecture is to remain a relevant social art a more holistic understanding of this phenomenon will be indispensable to the process of adapting to globalizing forces This examination of Chinese shopping malls offers a timely and relevant case study of what is happening in all our cities today

Understanding Cities Alexander Cuthbert, 2011-06-06 Understanding Cities is richly textured complex and challenging It creates the vital link between urban design theory and praxis and opens the required methodological gateway to a new and unified field of urban design Using spatial political economy as his most important reference point Alexander Cuthbert both interrogates and challenges mainstream urban design and provides an alternative and viable comprehensive framework for a new synthesis He rejects the idea of yet another theory in urban design and chooses instead to construct the necessary intellectual and conceptual scaffolding for what he terms The New Urban Design Building both on Michel de Certeau s concept of heterology thinking about thinking and on the framework of his previous books *Designing Cities* and *The Form of Cities* Cuthbert uses his prior adopted framework history philosophy politics culture gender environment aesthetics typologies and pragmatics to create three integrated texts Overall the trilogy allows a new field of urban design to emerge Pre existing and new knowledge are integrated across all three volumes of which *Understanding Cities* is the culminating text
