Architecture The Critics Choice:

Architecture Dan Cruickshank, 2000 *Architecture* Dan Cruickshank, 2000 Ten prominent architecture experts take a greatest hits approach to defining the major movements in western architectural styles technologies and philosophies
Booklist **God and Enchantment of Place** David Brown, 2004-10-15 David Brown argues for the importance of experience of God as mediated through place in all its variety He explores the various ways in which such experiences once formed an essential element in making religion integral to human life and argues for their reinstatement at the centre of theological discussions about the existence of God In effect the discussion continues the theme of Brown s two much praised earlier volumes Tradition and Imagination and Discipleship and Imagination in its advocacy of the need for Christian theology to take much more seriously its relationship with the various wider cultures in which it has been set In its challenge to conventional philosophy of religion the book will be of interest to theologians and philosophers and also to historians of art and culture generally **Sustainable Buildings and Infrastructure** Annie R. Pearce, Yong Han Ahn, HanmiGlobal Co, Ltd, 2017-12-14 The second edition of Sustainable Buildings and Infrastructure continues to provide students with an introduction to the principles and practices of sustainability as they apply to the construction sector including both buildings and infrastructure systems As a textbook it is aimed at students taking courses in construction management and the built environment but it is also designed to be a useful reference for practitioners involved in implementing sustainability in their projects or firms Case studies best practices and highlights of cutting edge research are included throughout making the book both a core reference and a practical guide *Architecture and Spectacle* Gevork Hartoonian, 2012 Focusing on six leading contemporary architects Peter Eisenman Frank Gehry Bernard Tschumi Zaha Hadid Rem Koolhaas and Steven Holl this book puts forward a unique and insightful analysis of neo avant garde architecture It discusses the spectacle and excess which permeates contemporary architecture in reference to the present aesthetic tendency for image making but does so by applying the tectonic of theatricality discussed by the nineteenth century German architect Gottfried Semper In doing so it breaks new ground by opening up a dialogue between the study of the past and the design of the present **Intertextuality** Graham Allen, 2021-10-14 This successful introduction to intertextuality deftly introduces this crucial area and relates its significance to key theories and movements in the study of literature The third edition is updated to include a brand new chapter looking at intermediality and how the study of intertextuality has changed over the last ten years Offering a clear guide to this crucial area Graham Allen outlines the history and contemporary use of the term incorporates a wealth of illuminating examples from literature and culture examines the politics and aesthetics of the term relates intertextuality to global cultures and new media Looking at intertextuality in relation to literary and critical theory as well as contemporary culture and media this book offers a fascinating and useful approach to all aspects of literary studies especially those dealing with adaptation media or comparative studies **Writing About Architecture** Alexandra Lange, 2012-02-29 Extraordinary

architecture addresses so much more than mere practical considerations. It inspires and provokes while creating a seamless experience of the physical world for its users. It is the rare writer that can frame the discussion of a building in a way that allows the reader to see it with new eyes. *Writing About Architecture* is a handbook on writing effectively and critically about buildings and cities. Each chapter opens with a reprint of a significant essay written by a renowned architecture critic followed by a close reading and discussion of the writer's strategies. Lange offers her own analysis using contemporary examples as well as a checklist of questions at the end of each chapter to help guide the writer. This important addition to the *Architecture Briefs* series is based on the author's design writing courses at New York University and the School of Visual Arts. Lange also writes a popular online column for *Design Observer* and has written for *Dwell*, *Metropolis*, *New York* magazine, and *The New York Times*. *Writing About Architecture* includes analysis of critical writings by Ada Louise Huxtable, Lewis Mumford, Herbert Muschamp, Michael Sorkin, Charles Moore, Frederick Law Olmsted, and Jane Jacobs. Architects covered include Marcel Breuer, Diller Scofidio Renfro, Field Operations, Norman Foster, Frank Gehry, Frederick Law Olmsted, SOM, Louis Sullivan, and Frank Lloyd Wright.

Dwell, 2003-03. At *Dwell* we're staging a minor revolution. We think that it's possible to live in a house or apartment by a bold modern architect to own furniture and products that are exceptionally well designed and still be a regular human being. We think that good design is an integral part of real life. And that real life has been conspicuous by its absence in most design and architecture magazines.

The Theory of Architecture. Paul-Alan Johnson, 1994-04-18. *The Theory of Architecture: Concepts, Themes, Practices*. Paul Alan Johnson. Although it has long been thought that theory directs architectural practice, no one has explained precisely how the connection between theory and practice is supposed to work. This guide asserts that architectural theory does not direct practice but is itself a form of reflective practice. Paul Alan Johnson cuts through the jargon and mystery of architectural theory to clarify how it relates to actual applications in the field. He also reveals the connections between new and old ideas to enhance the reader's powers of critical evaluation. Nearly 100 major concepts, themes, and practices of architecture as well as the rhetoric of architects and designers are presented in an easily accessible format. Throughout, Johnson attempts to reduce each architectural notion into its essential concept. By doing so, he makes theory accessible for everyday professional discussion. Topics are arranged under ten headings: identification, definition, power, attitudes, ethics, order, authority, governance, relationship, and expression. Areas covered under these headings include: Utopian thought in theories of architecture; Advocacy and citizen participation in architecture; The basis of architectural quality and excellence; The roles of the architect as artist, poet, scientist, and technologist; Ethical obligations of architecture; Rationales for models and methods of design; How authority is determined in architecture; How architects structure their concepts; Conventions of communication within the architectural profession. Each section begins by showing the etymology of key terms of the topic discussed along with a summary history of the topic's use in architecture. Discussions probe the conceptual and philosophical difficulties of different theories as well as their potential

and limitations in past and present usage Among the provocative issues discussed in terms of their relationship to architecture are chaos theory feminism service to the community and the use of metaphor Johnson points out with stunning clarity the intentions as well as the contradictions and inconsistencies of all notions and concepts All architects and designers as well as students and teachers in these disciplines will gain many insights about architectural thought in this groundbreaking text

No more giants Jessica Kelly, 2023-01-24 Architecture is more than buildings and architects It also involves photographers writers advertisers and broadcasters as well as the people who finance and live in the buildings Using the career of the critic J M Richards as a lens this book takes a new perspective on modern architecture Richards served as editor of The Architectural Review from 1937 to 1971 during which time he consistently argued that modernism was integrally linked to vernacular architecture not through style but through the principle of being an anonymous expression of a time and public spirit Exploring the continuities in Richards s ideas throughout his career disrupts the existing canon of architectural history which has focused on abrupt changes linked to individual pioneers encouraging us to think again about who is studied in architectural history and how they are researched
