The 'Made in Germany' Champion Brands Ugesh A. Joseph, 2016-03-09 Germany's economic miracle is a widely known phenomenon and the world leading innovative products and services associated with German companies are something that others seek to imitate. In The Made in Germany Champion Brands Ugesh A. Joseph provides an extensively researched insightful look at over 200 of Germany's best brands to see what they stand for, what has made them what they are today and what might be transferable. The way Germany is branded as a nation carries across into the branding of its companies and services, particularly the global superstar brands truly world class in size, performance and reputation. Just as important are the medium sized and small enterprises known as the *Mittelstand*. These innovative and successful enterprises from a wide range of industries and product/service categories are amongst the World market leaders in their own niche and play a huge part in making Germany what it is today. The book also focuses on German industrial entrepreneurship and a selection of innovative and emergent stars. All these companies are supported and encouraged by a sophisticated infrastructure of facilitators, influencers and enhancers: the research industry, trade and standards organizations, the fairs and exhibitions and all the social and cultural factors that influence, enhance and add positive value to the country's image. Professionals or academics interested in business entrepreneurship, branding and marketing, product or service development, international trade and business development policy will find fascinating insights in this book, while those with an interest in Germany from emerging industrial economies will learn something of the secrets of German success.

Balances Erich Robens, Shanath Amarasiri A. Jayaweera, Susanne Kiefer, 2013-10-01 The book deals mainly with direct mass determination by means of a conventional balance. It covers the history of the balance from the beginnings in Egypt earlier than 3000 BC to recent developments. All balance types are described with emphasis on scientific balances. Methods of indirect mass determination which are applied to very light objects like molecules and the basic particles of matter and celestial bodies are included. As additional guidance, today's manufacturers are listed and the profile of important companies is reviewed. Several hundred photographs, reproductions and drawings show instruments and their uses. This book includes commercial weighing instruments for merchandise and raw materials in workshops as well as symbolic weighing in the ancient Egyptian ceremony of Weighing of the Heart, the Greek fate balance, the Roman *Justitia*, *Juno Moneta* and Middle Ages scenes of the Last Judgement with Jesus or St Michael and of modern balances. The photographs are selected from the slide archives of the late Richard Vieweg (1896-1972) former President of the *Physikalisch Technische Bundesanstalt Braunschweig* Germany and of the late Hans R. Jenemann (1920-1966) former head of the Analytical Laboratory of Schott Gen. Mainz Germany and of his wife Irene (1933-2008) and of Erich Robens.
