Black And White Racial Identity:

Black and White Racial Identity Janet E. Helms, 1990 This book presents the major theories of black and white racial identity and also describes measures for assessing racial identity Original research addresses the relationship of racial identity to other personality characteristics

From Black to Biracial Kathleen Korgen, 1998-02-24 Is a person with both a white and African American parent black Thirty years ago in American society the answer would have been yes Today the answer most likely depends on whom you ask According to the U S Census a person with both a black and a white parent is in fact black However most young persons who fit this description describe themselves as biracial both black and white Most young Americans whatever their racial background agree Since the Voting Rights Act of 1965 signaled the culmination of the Civil Rights Movement a transformation has occurred in the racial self definition of Americans with both an African American and a white parent This book describes the transformation and explains why it has occurred and how it has come about Through extensive research and dozens of interviews Korgen describes how the transformation has its roots in the historical and cultural transitions in U S society since the Civil Rights era A ground breaking book From Black to Biracial will help all Americans understand the societal implications of the increasingly multiracial nature of our population From affirmative action to the present controversy over the U S Census 2000 the repercussions of the transformation in racial identity related here affect all race based aspects of our society Students and faculty in sociology and multicultural studies business leaders and general readers alike will benefit from reading this work

Carter, 1995 A revolutionary theory a clinical watershed a masterful text The Influence of Race and Racial Identity in Psychotherapy Robert T Carter changes the course of a century of psychological theory practice and education He debunks the traditional belief that race has a marginal impact on personality development and with compelling empirical evidence demonstrates that race is the defining factor above other experiences of living in the United States and a crucial ingredient in the therapeutic process Carter presents models of racial identity for all racial groups and offers numerous case studies of various psychosocial resolutions within racial groups He constructs the first racially inclusive model of psychotherapy a rigorous conceptual framework that affords clinicians a deeper awareness of how racial issues affect their dealings with patients and creates a means of integrating that knowledge into their practices The Influence of Race and Racial Identity in Psychotherapy Defines the decisive role of racial identity in personality development Presents a racially inclusive model of psychotherapy Describes how this model is applied in a clinical context Proposes new counselor training programs based on this model This immensely valuable text helps students in multicultural counseling and psychotherapy develop an awareness of their own levels of racial identity as well as those of their patients For practicing therapists it opens new vistas in the therapeutic process and provides new avenues through which to better understand and serve their patients

Racial Identity Theory Chalmer E. Thompson, Robert T. Carter, 2013-04-15 Racial identity theories

have been in the psychological literature for nearly thirty years Unlike most references to racial identity however Thompson and Carter demonstrate the value of integrating RACE and IDENTITY as systematic components of human functioning The editors and their contributors show how the infusion of racial identity theory with other psychological models can successfully yield more holistic considerations of client functioning and well being Fully respecting the mutual influence of personal and environmental factors to explanations of individual and group functioning they apply complex theoretical notions to real life cases in psychological practice These authors contend that race is a pervasive and formidable force in society that affects the development and functioning of individuals and groups In a recursive fashion individuals and groups influence and indeed nurture the notion of race and societal racism Arguing that mental health practitioners are in key influential positions to pierce this cycle the authors provide evidence of how meaningful change can occur when racial identity theory is integrated into interventions that attempt to diminish the distress people experience in their lives The interventions illustrated in this volume are applied in various contexts including psychotherapy and counseling supervision family therapy support groups and organizational and institutional environments This book can serve the needs and interests of advanced level students and professionals in all mental health fields as well as researchers and scholars in such disciplines as organizational management and forensic psychology It can also be of value to anyone interested in the systematic implementation of strategies to overcome problems of race
