Biomarkers in Autoimmune Diseases of the Central Nervous System Mei-Ping Ding, Long-Jun Wu, Shougang Guo, Honghao Wang, Yin-Xi Zhang, 2023-09-25 Autoimmune diseases of the central nervous system CNS are a group of complex and disabling disorders characterized by the immune system mistakenly attacking the CNS During the last 2 decades we have witnessed a rapidly evolving spectrum of CNS autoimmune diseases which has become a research hotspot in neurology These include CNS inflammatory demyelinating diseases such as multiple sclerosis and neuromyelitis optical spectrum disorders paraneoplastic

and other autoimmune encephalomyelitis and CNS involvement in systemic autoimmune diseases Recently although remarkable discoveries have accumulated more understanding of the autoimmune basis behind the physiopathologic mechanism the exact pathogenic processes are still unclear Patients may present with a variety of manifestations posing a great challenge to diagnosis and management The determination of biomarkers plays a significant role in CNS autoimmune diseases Biomarkers can reflect the presence nature and intensity of certain immune responses triggered by both genetic and environmental processes and bear great importance in guiding clinical diagnosis estimating disease risk or prognosis evaluating disease severity and monitoring progression or response to therapy For instance the detection of disease specific antibodies can contribute to the accurate diagnosis and precise treatment Moreover identifying the diverse biomarkers could further help to achieve the ultimate goal of personalized medicine
