Bre Good Repair Guide 10:

Building Maintenance Brian J.B. Wood, 2009-09-28 Maintaining a building is expensive it costs many times more to run a building over its lifetime than to build it yet maintenance is often not accorded the priority it warrants A poorly maintained building will be a drain on resources and will impair building use whereas a well maintained building will function smoothly and represent an appreciating asset to its owners Building Maintenance is a core text on the technical aspects of maintenance for undergraduate degree students on built environment courses particularly building surveying and facilities management It addresses the who what where when how and why of maintenance activities and shows that maintenance should be considered seriously at the design stage Extensive case studies illustrate what can go wrong how to put matters right and how to get it right first time next time A professional approach is required to building maintenance By encouraging maintenance managers to stand back and take a strategic view of building maintenance alongside their day to day tasks this book will help practitioners and students to achieve that

Refurbishment and Upgrading of Buildings David Highfield, Christopher Gorse, 2009-05-28 A detailed guide to the technical aspects of refurbishing and upgrading buildings this book provides solutions to a range of problems challenges and issues and is essential reading for all students studying building refurbishment at all levels Includes existing floor and wall strengthening facade retention introduction of new floors timber decay problems fire resistance prevention of moisture and damp upgrading thermal and acoustic performance This new edition has been fully updated to include new technological information and covers new areas such as stonework restoration and repair upgrading of c1960 framed buildings refurbishment logistics and case studies *BRE Digest*, 2009-11

Survey and Repair of Traditional Buildings Richard Oxley, 2015-11-17 Understanding the unique requirements of traditional buildings is crucial to providing appropriate guidance on their care and repair This book will help practitioners identify the particular issues relating to older buildings and the problems they may encounter when surveying and repairing them With the use of examples the author provides invaluable information on how traditional buildings perform emphasizing the need for a sensitive and sustainable approach which also takes account of the specific needs of the building The book examines all aspects to be included in any assessment for survey and repair and points out in detail the potential pitfalls It also explores the controversial issues surrounding the treatment of damp and timber decay advocating solutions that are appropriate to older buildings rather than using standard often damaging methods of treatment The extensive case studies not only illustrate good conservation in practice but also how projects can go badly wrong and how mistakes could have been avoided This title explores the causes of movement and the actions required It advises on alternatives to chemical treatment for damp and timber decay It provides fully illustrated case studies with numerous photographs It emphasizes a sustainable approach to conservation It outlines the key legislation issues It includes the Historic Buildings Prosecution Fines Database and other useful appendices *BRE Good Building Guide*, 2007 *Diagnosing Damp* Ralph Burkinshaw, Mike Parrett, 2003

Diagnosing damp takes the surveyor through the necessary techniques for undertaking a thorough examination of a building for dampness and to understand the limitations imposed at each level of investigation

Residential Property Appraisal Phil Parnham, Larry Russen, 2022-11-30 Residential Property Appraisal Volumes 1 and 2 are handbooks not only for students studying residential surveying but also for those involved in the appraisal of residential property Volume 1 has been updated and covers the valuation process as it relates to residential properties particularly when valuation is undertaken for secured lending purposes It addresses the basic skills required the risks posed in a valuation the key drivers of value emerging issues that impact valuation and the key legal and RICS regulatory considerations that a valuer needs to understand Volume 2 of the series goes on to consider the practical aspects of the survey and inspection of residential properties in more detail Not only does this include updated sections on the most common defects for example building movement moisture problems wood rot and wood boring insects it also covers emerging challenges including assessing personal safety hazards modern construction technologies and materials and invasive plants The volume also takes account of the Home Survey Standard recently published by the RICS and the changes resulting from climate change the energy crisis and concerns about fire safety Building services in domestic residential properties is another area of rapid change especially with the development of low carbon and renewable technologies To ensure that this aspect is covered in sufficient detail the content is to be included in Volume 3 Assessing Building Services An essential book for students studying to enter the residential survey and valuation profession and for existing practitioners who wish to improve their knowledge of current practices
