Winterton,2015-11-09 The importance of reconciling the continuing needs of humankind with the protection of the
environment and the earth's ability to provide for those needs is now better recognised Chemistry and chemical technology
play an important role in this though not on their own Interdisciplinarity and multidisciplinary are therefore critically
important concepts This book the first of its kind provides an interdisciplinary introduction to sustainability issues in the
context of chemistry and chemical technology The prime objective of this book is to equip young chemists and others to
better appreciate defend and promote the role that chemistry and its practitioners play in moving towards a society better
able to control manage and ameliorate its impact on the ecosphere To do this it is necessary to set the ideas concepts
achievements and challenges of chemistry and its application in the context of its environmental impact past present and
future and the changes needed to bring about a more sustainable yet equitable world Covering aspects assumed barely
addressed or neglected in previous publications it puts Green Chemistry in a much wider historic scientific technological
intellectual and societal context and addresses complexities and challenges associated with attitudes to science and
technology media treatment of scientific and technological controversies and difficulties in reconciling environmental
protection and global development While the book stresses the central importance of rigour in the collection and treatment
of evidence and reason in decision making to ensure that it meets the needs of a wide community of students it is broad in
scope rather than deep It is therefore appropriate to a wide audience including practising scientists and technologists
