Brain Fiction Self Deception And The Riddle Of Confabulation Philosophical Psychopathology:

Brain Fiction William Hirstein, 2005 The phenomenon of confabulation the tendency to construct plausible sounding but false answers and believe that they are true and what it can tell us about the human mind and human nature Disturbed Consciousness Rocco J. Gennaro, 2024-05-28 Essays defend discuss and critique specific theories of consciousness with respect to various psychopathologies In Disturbed Consciousness philosophers and other scholars examine various psychopathologies in light of specific philosophical theories of consciousness The contributing authors some of them discussing or defending their own theoretical work consider not only how a theory of consciousness can account for a specific psychopathological condition but also how the characteristics of a psychopathology might challenge such a theory Thus one essay defends the higher order thought HOT theory of consciousness against the charge that it cannot account for somatoparaphrenia a delusion in which one denies ownership of a limb Another essay argues that various attempts to explain away such anomalies within subjective theories of consciousness fail Other essays consider such topics as the application of a model of unified consciousness to cases of brain bisection and dissociative identity disorder prefrontal and parietal underconnectivity in autism and other psychopathologies self deception and the self model theory of subjectivity schizophrenia and the vehicle theory of consciousness and a shift in emphasis away from an internal or brainbound approach to psychopathology to an interactive one Each essay offers a distinctive perspective from the intersection of philosophy consciousness research and psychiatry Contributors Alexandre Billon Andrew Brook Paula Droege Rocco J Gennaro Philip Gerrans William Hirstein Jakob Hohwy Uriah Kriegel Timothy Lane Thomas Metzinger Erik Myin Inez Myin Germeys Myrto Mylopoulos Gerard O'Brien Jon Opie J Kevin O'Regan Iuliia Pliushch Robert Van Gulick **Extraordinary Science and Psychiatry** Jeffrey Poland, Serife Tekin, 2024-04-30 Leading scholars offer perspectives from the philosophy of science on the crisis in psychiatric research that exploded after the publication of DSM 5 Psychiatry and mental health research is in crisis with tensions between psychiatry's clinical and research aims and controversies over diagnosis treatment and scientific constructs for studying mental disorders At the center of these controversies is the Diagnostic and Statistical Manual of Mental Disorders DSM which especially after the publication of DSM 5 many have found seriously flawed as a guide for research This book addresses the crisis and the associated extraordinary science Thomas Kuhn's term for scientific research during a state of crisis from the perspective of philosophy of science The goal is to help reconcile the competing claims of science and phenomenology within psychiatry and to offer new insights for the philosophy of science The contributors discuss the epistemological origins of the current crisis the nature of evidence in psychiatric research and the National Institute for Mental Health's Research Domain Criteria project They consider particular research practices in psychiatry computational personalized mechanistic and user led and the specific categories of schizophrenia depressive disorder and bipolar disorder Finally they examine the DSM's dubious practice of pathologizing normality Contributors Richard P Bentall

John Bickle Robyn Bluhm Rachel Cooper Kelso Cratsley Owen Flanagan Michael Frank George Graham Ginger A Hoffman Harold Kincaid Aaron Kostko Edouard Machery Jeffrey Poland Claire Pouncey erife Tekin Peter Zachar Scaffolded Minds Somogy Varga,2025-02-04 A comprehensive account of cognitive scaffolding and its significance for understanding mental disorders In Scaffolded Minds Somogy Varga offers a novel account of cognitive scaffolding and its significance for understanding mental disorders The book is part of the growing philosophical engagement with empirically informed philosophy of mind which studies the interfaces between philosophy and cognitive science Varga draws on two recent shifts within empirically informed philosophy of mind the first toward an intensified study of the embodied mind and the second toward a study of the disordered mind that acknowledges the convergence of the explanatory concerns of psychiatry and interdisciplinary inquiries into the mind Varga sets out to accomplish a dual task theoretical mapping of cognitive scaffolding and the application calibration of fine grained philosophical distinctions to empirical research He introduces the notion of actively scaffolded cognition ASC and offers a taxonomy that distinguishes between intrasomatic and extrasomatic scaffolding He then shows that ASC offers a productive framework for considering certain characteristic features of mental disorders focusing on altered bodily experience and social cognition deficits With Cognitive Scaffolding Varga aims to establish that shifting attention from mental symptoms to fine grained sensorimotor aspects can lead to identifying diagnostic subtypes or even specific sensorimotor markers for early diagnosis **The Epistemic Innocence of Irrational Beliefs**

Lisa Bortolotti,2020-06-11 In an ideal world our beliefs would satisfy norms of truth and rationality as well as foster the acquisition retention and use of other relevant information In reality we have limited cognitive capacities and are subject to motivational biases on an everyday basis We may also experience impairments in perception memory learning and reasoning in the course of our lives Such limitations and impairments give rise to distorted memory beliefs confabulated explanations and beliefs that are elaborated delusional motivated delusional or optimistically biased In this book Lisa Bortolotti argues that some irrational beliefs qualify as epistemically innocent where in some contexts the adoption maintenance or reporting of the beliefs delivers significant epistemic benefits that could not be easily attained otherwise Epistemic innocence does not imply that the epistemic benefits of the irrational belief outweigh its epistemic costs yet it clarifies the relationship between the epistemic and psychological effects of irrational beliefs on agency It is misleading to assume that epistemic rationality and psychological adaptiveness always go hand in hand but also that there is a straight forward trade off between them Rather epistemic irrationality can lead to psychological adaptiveness which in turn can support the attainment of epistemic goals Recognising the circumstances in which irrational beliefs enhance or restore epistemic performance informs our mutual interactions and enables us to take measures to reduce their irrationality without undermining the conditions for epistemic success *Being Amoral* Thomas Schramme,2014-08-22 Investigations of specific moral dysfunctions or deficits that shed light on the capacities required for moral agency Psychopathy has been the subject of investigations in both

philosophy and psychiatry and yet the conceptual issues remain largely unresolved This volume approaches psychopathy by considering the question of what psychopaths lack The contributors investigate specific moral dysfunctions or deficits shedding light on the capacities people need to be moral by examining cases of real people who seem to lack those capacities The volume proceeds from the basic assumption that psychopathy is not characterized by a single deficit for example the lack of empathy as some philosophers have proposed but by a range of them Thus contributors address specific deficits that include impairments in rationality language fellow feeling volition evaluation and sympathy They also consider such issues in moral psychology as moral motivation moral emotions and moral character and they examine social aspects of psychopathic behavior including ascriptions of moral responsibility justification of moral blame and social and legal responses to people perceived to be dangerous As this volume demonstrates philosophers will be better equipped to determine what they mean by the moral point of view when they connect debates in moral philosophy to the psychiatric notion of psychopathy which provides some guidance on what humans need in order be able to feel the normative pull of morality And the empirical work done by psychiatrists and researchers in psychopathy can benefit from the conceptual clarifications offered by philosophy Contributors Gwen Adshead Piers Benn John Deigh Alan Felthous Kerrin Jacobs Heidi Maibom Eric Matthews Henning Sass Thomas Schramme Susie Scott David Shoemaker Walter Sinnott Armstrong Matthew Talbert *Confabulation* William Hirstein, 2009 When people confabulate they make an ill grounded claim that they honestly believe is true for example recalling an event from their childhood that never actually happened This interdisciplinary book brings together some of the leading thinkers on confabulation in neuroscience psychiatry psychology philosophy **Psychiatry in the Scientific Image** Dominic Murphy, 2012-01-13 An analysis of the understanding classification and explanation of mental disorders that proposes that psychiatry adopt the best practices of the cognitive sciences In *Psychiatry in the Scientific Image* Dominic Murphy looks at psychiatry from the viewpoint of analytic philosophy of science considering three issues how we should conceive of classify and explain mental illness If someone is said to have a mental illness what about it is mental What makes it an illness How might we explain and classify it A system of psychiatric classification settles these questions by distinguishing the mental illnesses and showing how they stand in relation to one another This book explores the philosophical issues raised by the project of explaining and classifying mental illness Murphy argues that the current literature on mental illness exemplified by the Diagnostic and Statistical Manual of Mental Disorders is an impediment to research it lacks a coherent concept of the mental and a satisfactory account of disorder and yields too much authority to commonsense thought about the mind He argues that the explanation of mental illness should meet the standards of good explanatory practice in the cognitive neurosciences and that the classification of mental disorders should group symptoms into conditions based on the causal structure of the normal mind **On Delusion** Jennifer Radden, 2010-09-13 Delusions play a fundamental role in the history of psychology philosophy and culture dividing not only the mad from the sane but

reason from unreason Yet the very nature and extent of delusions are poorly understood What are delusions How do they differ from everyday errors or mistaken beliefs Are they scientific categories In this superb panoramic investigation of delusion Jennifer Radden explores these questions and more unravelling a fascinating story that ranges from Descartes s demon to famous first hand accounts of delusion such as Daniel Schreber s Memoirs of My Nervous Illness Radden places delusion in both a clinical and cultural context and explores a fascinating range of themes delusions as both individually and collectively held including the phenomenon of folies deux spiritual and religious delusions in particular what distinguishes normal religious belief from delusions with religious themes how we assess those suffering from delusion from a moral standpoint and how we are to interpret violent actions when they are the result of delusional thinking As well as more common delusions such as those of grandeur she also discusses some of the most interesting and perplexing forms of clinical delusion such as Cotard and Capgras

Brain Theory C. Wolfe, 2014-05-13 Philosophy has long puzzled over the relation between mind and brain This volume presents some of the state of the art reflections on philosophical efforts to make sense of neuroscience as regards issues including neuroaesthetics brain science and the law neurofeminism embodiment race memory and pain
