Brain-Based Worship Paula Champion-Jones, 2014-10-07 Historically, it has been believed that Christian formation occurs primarily in the context of worship. Because both traditional and contemporary worship services are routinely structured around the skills of persuasive rhetoric and logic, most worship services effectively ignore the impact of experiential embodied knowledge. Recent research in neuroscience has proven that humans are sensory-motor emotional thinking beings who learn best when body, brain, and emotions are simultaneously engaged. A fresh paradigm for teaching brain-based learning is proving to result in learning that is more memorable, more likely to result in long-term change in the behavior of the learner, and more likely to spur the learner to investigate the subject further. The Church needs to employ brain-based teaching methods in order to more effectively transmit the Gospel.

High-Five Teaching, K-5 Rich Allen, Cindy Rickert, 2010-08-23 The ideas in this book make learning come alive in your classroom. The authors present activities that any teacher can implement. Linda K. Taylor, Assistant Professor, Ball State University. With this book, teachers can truly discover what it takes to reach and empower every learner.

High Five Teaching is replete with specific examples and fun suggestions any teacher can use in today's classroom. Renee Peoples, Teacher Leader, Swain West Elementary, Bryson City, NC, Transform your classroom into a dynamic learning environment for all students. This exciting new volume shows elementary teachers how to put into practice the principles described in Rich Allen's book *Green Light Classrooms*. Drawing from Cindy Rickert's real-life experiences as a teacher creating Green Light inclusive classrooms, the authors offer a wealth of practical tips, examples, and ideas for involving students in active learning rather than traditional chalk and talk instruction. Readers will acquire implementation strategies to increase student interaction and motivation and ultimately improve achievement. In tune with the way today's digitally savvy students learn best, this book offers Five principles of high five teaching that ensure a welcoming, active, and student-centered learning environment. Detailed sample lesson plans in math, science, reading, writing, and social studies. Case studies, technology connections, and ways to create true learning communities. An appendix of sample forms, games, and other essential classroom resources. Designed specifically to engage today's students, this guide offers tools and strategies to inspire best practices in every classroom.

Paradigm Shifts in 21st Century Teaching and Learning Orakci, Şenol, 2020-04-24. One of the most important transformations in the world today is the adaptation to education and teaching methods that must be made to enhance the learning experience for Millennial and Generation Z students. The system in which the student is passive and the teacher is active is no longer the most effective form of education. Additionally, with the increased availability to information, knowledge transfer is no longer done solely by the teacher. Educators need to become moderators in order to promote effective teaching practices. *Paradigm Shifts in 21st Century Teaching and Learning* is an essential scholarly publication that examines new approaches to learning and their application in the teaching-learning process. Featuring a wide range of topics such as game-based learning, curriculum design, and sustainability, this book is ideal for teachers, curriculum developers, instructional designers, researchers, education professionals, administrators, academicians, educational policymakers, and students.

Brain Function Assessment in Learning Claude Frasson, Panagiotis Bamidis, Panagiotis Vlamos, 2020-10-02. This book constitutes the thoroughly refereed proceedings of the Second International Conference on Brain Function Assessment in Learning (BFAL 2020) held in Heraklion, Crete, Greece, in October 2020. The 11 revised full papers and 10 short papers presented were carefully selected from 35 submissions. The BFAL conference aims to regroup research in multidisciplinary domains such as neuroscience, computer science, medicine, education, human-computer interactions, and social interaction on the theme of Brain Function Assessment in Learning. The conference was held virtually due to the COVID-19 pandemic.
