Brainstorming For A Beautiful Planet:

Brainstorming for a Beautiful Planet Nicholas Varias, 2013-05-16 Brainstorming for a Beautiful Planet is a book of ideas The architect author challenges conventional wisdom and proposes innovative solutions for resolving the apparent conflict between our society and the natural world that sustains us You are invited to think out of the box and consider his views and proposals for counteracting climate change The first part Repairing the World presents some of the main ingredients of sustainability and prepares you for the innovative and sometimes unconventional concepts that follow in the second part of the book The problems we face today are all pieces of a critical puzzle and how we will solve them will determine our future on this planet Brainstorming for solutions to save our planet is the main purpose of this book Yet a fundamental shift in human attitude towards the world must occur first in order for these efforts to succeed Current global conflicts such as the clash between the West and radical Islam are impairing humanity's ability to focus its energy and resources on dealing with climate change In the first chapter the author offers his understanding of human mentality and behaviour and their effects on the world In the second part Unconventional Ideas for the Third Millennium the author proposes a number of concepts for a sustainable future FlexSola Flexible Solar House Trains over Highways The Reunification of Oakville Honeycomb Villages Rescuing Coral Reef Islands and Future Space Habitat Richly illustrated and very informative the book will capture the attention and stimulate the imagination of those who are truly concerned about our world *Biotechnologies and Biomimetics for Civil Engineering* Fernando Pacheco Torgal, J. A. Labrincha, M. V. Diamanti, C.-P. Yu, H. K. Lee, 2014-08-16 Putting forward an innovative approach to solving current technological problems faced by human society this book encompasses a holistic way of perceiving the potential of natural systems Nature has developed several materials and processes which both maintain an optimal performance and are also totally biodegradable properties which can be used in civil engineering Delivering the latest research findings to building industry professionals and other practitioners as well as containing information useful to the public *Biotechnologies and Biomimetics for Civil Engineering* serves as an important tool to tackle the challenges of a more sustainable construction industry and the future of buildings EDEN'S REPRISAL Tene Miller, 2013-07 In this sequel to *Eden's Allure* Erin finds herself back on Eden against her will Amongst the other kidnapped teenagers there is a new powerful resident with his own agenda But this time the planet is fighting back and the residents are fighting for their lives The residents are on a mission to get back to Earth but come across life threatening encounters that stand in their way Meanwhile a mutant dog finds its way to Earth where chaos ensues leaving serious damage that no one expected **Brainstorming for a Beautiful Planet** Nicholas Varias, 2022-08-18 The first argument of this book is the urgent need to reset architectural and urban planning practices which is essential for the preservation of our planet and to ensure our long term survival The author believes that this reset could be accomplished by elevating architecture and urban planning both physically and spiritually The aim is to create

environmentally friendly and self sufficient communities constructed with innovative modular systems and linked by elevated fast trains Major future urban development shall take place above the ground with minimal interference with the natural environment The second argument is that the existential conflict between human society and the natural world could be resolved only by planning for people to live and work in the immediate vicinity of the earth This will permit the Earth to recover and be preserved as a museum for future generations to visit from outer space The effort to promote extraterrestrial human habitat should be a necessary complement and not a substitute for supporting the efforts to curb climate change which is part of the first argument of this book Chapters 1 2 4 introduce the modular building systems invented by the author and their application to adaptable affordable and accessible housing Chapters 3 5 describe his concepts for elevated urbanism using his modular systems In Chapter 6 the author shows how honeycomb modules could be used for building space stations with artificial gravity The primary audience for this book is architects engineers and those who teach and study these professions It could inspire them for achieving professional reconciliation with the natural environment and to contribute to effective action for adapting to climate change Secondly space physicists and other experts involved in space exploration may be interested in evaluating the author s architectural concepts for creating space stations with artificial gravity Thirdly progressive real estate developers who are searching for new opportunities may find my modular designs a good fit for their innovative developments And lastly all those who care about the Earth at the very least will have an enjoyable reading full of surprises This book contains proprietary information which is free to use in academic learning or for non profit enterprise The use for profit is also possible but only with the author s written permission explicitly granted

The GLOBE Program Teacher's Guide ,1996 *GLOBE Program Teacher's Guide* ,1996 *UNCROWNED HEROES OF HISTORY: ANIMALS* DURSUN MURAT GUL, This book was written to pay man s moral debt of loyalty to nature and living species other than himself My aim as I mentioned above is to give due credit to other creatures and especially animals who have rights over this world we live in as humans I hope the book achieves its purpose out when doing your reading
