Applied and Systemic-Structural Activity Theory Gregory Z. Bedny, Inna S. Bedny, 2019-06-11 This book presents new data in Applied Activity Theory AAT and Systemic Structural Activity Theory SSAT that can be used in the study of human performance The SSAT is the high level generality theory that offers standardized principles of the analyses of human activity These principles can be utilized in theoretical and applied studies This multi contributed book offers a selection of works that will provide a holistic picture of the field The new data can be utilized for the study of extremely complex human machine and human computer interaction systems and for evaluation of efficiency complexity and reliability of such systems at the design stage Features Shows examples of self regulative models of various cognitive processes Illustrates a method of study of production process in the construction industry Includes topics on learning training and management Covers a new method of computer based automated support of decision making under risk and uncertainty Presents a new method of evaluation of probabilistic structure of tasks and the method of assessing reliability of human performance

Application of Systemic-Structural Activity Theory to Design and Training Gregory Z. Bedny, 2014-12-18 This book offers analytical methods for studying human work in ergonomics and psychology that are similar to ones utilized by the engineering sciences SSAT offers not only new qualitative but also formalized and quantitative methods of analysis This book will describe quantitative methods of task complexity and reliability assessment application

Praxiology and the Philosophy of Technology Timo Airaksinen, 2021-10-18 Technology is a crucial feature of the modern world and human beings are necessarily technological creatures Our goal must be to use

technology effectively efficiently and ethically We have hands that are adept at using tools and intelligence that guides our actions We also have desires and emotions that motivate us to achieve more and more never allowing us to stop From the viewpoint of praxiology technology does not exist merely to satisfy the human need in an effective and efficient way The problems of the modern world and the questions we must ask with respect to technology and how it is used are complicated and demanding They may initially seem mysterious perhaps even partly subconscious In this fifteenth volume of a distinguished international series contributors address essential questions about the philosophy and ethics of technology Their intention is to point out the road not only to its better applications but also to its greater understanding The first part of the book addresses general questions about the theory of technology The second part of the volume focuses on special topics like information and communication technologies and work systems as well as the foundations of problem solving and the history of innovation in the age of enlightenment The third part of the book is on ethical judgments It emphasizes the importance of ethics in the application of technology and especially when we commercialize it in order to meet the needs of the people in a free market society This volume offers its reader a balanced picture of the state of the art of theoretical and applied issues in technology research emphasizing the praxiological perspective that characterizes the entire series

Advances in Human Factors and Systems Interaction Isabel L. Nunes, 2019-06-04 This book reports on cutting edge research into innovative system interfaces highlighting both lifecycle development and human technology interaction especially in virtual augmented and mixed reality systems It describes advanced methodologies and tools for evaluating and improving interface usability and discusses new models as well as case studies and good practices The book addresses the human hardware and software factors in the process of developing interfaces for optimizing total system performance while minimizing their costs It also highlights the forces currently shaping the nature of computing and systems such as the importance of portability and technologies for reducing power requirements the necessity of a better assimilation of computation in the environment as well as solutions to promote accessibility to computers and systems for people with special needs The book which is based on the AHFE 2019 International Conference on Human Factors and Systems Interaction held on July 24-28 2019 in Washington D C USA offers a timely survey and practice oriented guide for systems interface users and developers alike

Self-Regulation in Activity Theory Gregory Z. Bedny, Waldemar Karwowski, Inna Bedny, 2018-10-03 Every complex human machine system includes a computer as a critically important means of work However an operator's interaction with a computerized system cannot be reduced to only performing computer based tasks Today human computer interaction HCI is not limited to trained software users People of all ages use all different kinds of gadget

Advances in Ergonomics In Design, Usability & Special Populations: Part II Francisco Rebelo, Marcelo Soares, 2022-07-19 Successful interaction with products tools and technologies depends on usable designs and accommodating the needs of potential users without requiring costly training In this context this book is concerned with

emerging ergonomics in design concepts theories and applications of human factors knowledge focusing on the discovery design and understanding of human interaction and usability issues with products and systems for their improvement This book will be of special value to a large variety of professionals researchers and students in the broad field of human modeling and performance who are interested in feedback of devices interfaces visual and haptic user centered design and design for special populations particularly the elderly We hope this book is informative but even more that it is thought provoking We hope it inspires leading the reader to contemplate other questions applications and potential solutions in creating good designs for all
