Guide to Working with Universities James W. Dean Jr.,Deborah Y. Clarke,2019-08-13 Colleges and universities stand to benefit greatly when businesspeople engage with them whether through governing boards alumni associations consulting arrangements philanthropy or other channels But many businesspeople are frustrated by the way institutions of higher education work or rather how they don t work Why do decisions in universities take so long and involve so many people Why aren t profit and growth top priorities for colleges Why can t the faculty be managed like any other employees Shouldn t alumni have a greater say as they continue to invest in their alma mater As leaders in higher education James W Dean Jr and

Deborah Y Clarke have years of experience addressing these questions for a wide range of professionals outside the academy This book draws on their expertise to offer real world guidance for businesspeople who work with and seek to improve colleges and universities Dean and Clarke differentiate and clarify the motivations and structures that make universities unique among American enterprises And while they acknowledge the challenges that businesspeople often face when working with academic institutions they explain that understanding the distinct mission of higher education is essential to being able to effect change within these organizations Presenting insights from interviews with a wide range of stakeholders Dean and Clarke give succinct and practical advice for working with universities

Reluctant Capitalists Laura J. Miller, 2008-09-15 Over the past half century bookselling like many retail industries has evolved from an arena dominated by independent bookstores to one in which chain stores have significant market share And as in other areas of retail this transformation has often been a less than smooth process This has been especially pronounced in bookselling argues Laura J Miller because more than most other consumer goods books are the focus of passionate debate What drives that debate And why do so many people believe that bookselling should be immune to questions of profit In *Reluctant Capitalists* Miller looks at a century of book retailing demonstrating that the independent chain dynamic is not entirely new It began one hundred years ago when department stores began selling books continued through the 1960s with the emergence of national chain stores and exploded with the formation of superstores in the 1990s The advent of the Internet has further spurred tremendous changes in how booksellers approach their business All of these changes have met resistance from book professionals and readers who believe that the book business should somehow be above market forces and instead embrace more noble priorities Miller uses interviews with bookstore customers

and members of the book industry to explain why books evoke such distinct and heated reactions She reveals why customers have such fierce loyalty to certain bookstores and why they identify so strongly with different types of books In the process she also teases out the meanings of retailing and consumption in American culture at large underscoring her point that any type of consumer behavior is inevitably political with consequences for communities as well as commercial institutions
