[Ancient Mesopotamian Materials and Industries](#) Peter Roger Stuart Moorey,1999 This is the first systematic attempt to survey in detail the archaeological evidence for the crafts and craftsmanship of the Sumerians

Babylonians and Assyrians in ancient Mesopotamia covering the period ca 8000 300 B C E As creators of some of the earliest farming and urban communities known to us these people were among the first pioneers of many crafts and skills that remain fundamental to modern ways of life Many of the raw materials for crafts had to be imported from outside the river valley of the Tigris and Euphrates providing an unusually sensitive indicator of the commercial and cultural contacts of Mesopotamia In this book Dr Moorey reviews briefly the textual evidence and then goes on to examine in detail the material evidence for a wide range of crafts using stones both common and ornamental animal products from hippopotamus ivory to ostrich egg shells ceramics glazed materials and glass metals and building materials With a comprehensive bibliography this will be a key work of reference for archaeologists and those interested in the early history of crafts and technology as well as for specialist historians of the ancient Near East Resources in Education ,1993 The Common Core, an Uncommon Opportunity Judith K. March,Karen H. Peters,2014 Because the Common Core requires bold action Why The Common Core an Uncommon Opportunity Why now Because it tackles a largely overlooked component of implementation how to redesign your instructional delivery system K 12 And you ll have to if you don t you ll be subject to the very same failure and frustration so many other districts and schools are experiencing What s more March and Peters describe how to integrate 21st Century Skills at the very same time It will help district leaders Develop structured consistent and organized teaching and learning practices Make district wide infrastructure adjustments for sustained reform Use best practices for sustained achievement and continuous curriculum review

Problems of Canonicity and Identity Formation in Ancient Egypt and Mesopotamia Gojko Barjamovic,Kim Ryholt,2016-04-24 The term canonicity implies the recognition that the domain of literature and of the library is also a cultural and political one related to various forms of identity formation maintenance and change Scribes and benefactors create canon in as much as they teach analyze preserve prom ulgate and change canonical texts according to prevailing norms From early on texts from the written traditions of ancient Mesopotamia and Egypt were accumulated codified and to some extent canonized as various collections developed mainly in the environment of the temple and the palace These written traditions represent sets of formal and informal cultures that all speak in their own ways of canonicity normativity and other forms of cultural expertise Some forms of literature were used not only in scholarly contexts but also in political ones and they served purposes of identity formation This volume addresses the interrelations between various forms of canon and identity formation in different time periods genres regions and contexts as well as the application of contemporary conceptions of canon to ancient texts Transforming Schools Using Project-Based Learning, Performance Assessment, and Common Core Standards Bob Lenz,Justin Wells,Sally Kingston,2015-01-08 It s not what students know but what they do with what they know that is important Schools are changing in response to this reality and in Transforming Schools Using Project Based Learning Performance Assessment and Common Core Standards Bob Lenz Justin Wells and Sally Kingston draw on the example of the Envision Education schools as well as other leading schools around the country to

show how the concept of deeper learning can meet the need for students who are both college and career ready and engaged in their own education In this book the authors explain how project based learning can blend with Common Core aligned performance assessment for deeper learning You ll discover how many schools have successfully made the transition from traditional teacher centered learning to project based deeper learning and find many practical ideas for implementation Companion DVD and website include videos showing how to implement deeper learning strategies in the classroom Evidence based descriptions show why deeper learning is right for students Performance assessment experts explain how to align assessments with Common Core by shifting the emphasis from knowing to doing Extensive game plan section provides step by step guidance for change Schools are complex organizations and transformation involves all of the stakeholders from students to superintendents But as this book shows there are amazing benefits to be realized when everyone commits to diving deeper into learning

Why Knowledge Matters E. D. Hirsch, 2019-01-02 In *Why Knowledge Matters* E D Hirsch Jr presents evidence from cognitive science sociology and education history to further the argument for a knowledge based elementary curriculum Influential scholar Hirsch author of *The Knowledge Deficit* asserts that a carefully planned curriculum that imparts communal knowledge is essential in achieving one of the most fundamental aims and objectives of education preparing students for lifelong success Hirsch examines historical and contemporary evidence from the United States and other nations including France and affirms that a knowledge based approach has improved both achievement and equity in schools where it has been instituted In contrast educational change of the past several decades in the United States has endorsed a skills based approach founded on Hirsch points out many incorrect assumptions about child development and how children learn He recommends new policies that are better aligned with our current understanding of neuroscience developmental psychology and social science The book focuses on six persistent problems that merit the attention of contemporary education reform the over testing of students in the name of educational accountability the scapegoating of teachers the fadeout of preschool gains the narrowing of the curriculum to crowd out history geography science literature and the arts the achievement gap between demographic groups and the reliance on standards such as the Common Core State Standards that are not linked to a rigorous curriculum *Why Knowledge Matters* makes a clear case for educational innovation and introduces a new generation of American educators to Hirsch s astute and passionate analysis

Encoding Metalinguistic Awareness E. Cancik-Kirschbaum, J. C. Johnson, 2019-12-31 *The Ancient Near East* provides a particularly striking example for the dynamics of knowledge transfer throughout space and time The civilizations that emerged here at the dawn of history attest to continuous processes of exchange adaption and negotiation to the emergence of content and its reconfiguration to diffusion disappearance and resurgence of themes concepts topics and ideas In the late fourth millennium the creation and implementation of supraregional notational systems in southern Mesopotamia triggers a cognitive revolution within a few centuries the use of writing becomes a dominant cultural technique and over the subsequent millennia the

technique of wedge writing spreads throughout southwest Asia. Numerous indigenous cuneiform subcultures came into being in a wide variety of times and places but these distinct instantiations were held together and preserved the possibility of common legibility through shared practices of teaching and learning a common core of textual materials and not least a systematic instrumentarium for representing speech and notation. This repertoire is part of each of these streams of tradition which characterise the cuneiform cultures as a whole. In light of the centuries of tradition the great effort that has gone into its construction and maintenance as well as the preservation of original linguistic materials and their translation into more familiar languages the validity of this scientific tradition broadly conceived cannot be disputed. Still even if the historical processes of transmission within the cuneiform world and the difficulties of translating cuneiform sources into non cuneiform traditions prevented a general and far reaching mobilisation of the cuneiform sources as vehicles for scientific reflection these same factors also ensured its continued survival in Mesopotamia and Syria for not centuries but rather millennia. One of the most important components of this process was the awareness of practitioners about language its role for and its impact on the generation of knowledge and specifically about linguistic patterns. Among the literally innumerable textual artefacts from the ancient Near East there are some that both explicitly and implicitly encode traces of this distinctively linguistic awareness. It was in pursuit of these traces of meta linguistic awareness that the participants in this volume came together.

Journey to the City Steve Tinney, Karen Sonik, 2019-06-07. The Penn Museum has a long and storied history of research and archaeological exploration in the ancient Middle East. This book highlights this rich depth of knowledge while also serving as a companion volume to the Museum's signature Middle East Galleries opening in April 2018. This edited volume includes chapters and integrated short focused pieces from Museum curators and staff actively involved in the detailed planning of the new galleries. In addition to highlighting the most remarkable and interesting objects in the Museum's extraordinary Middle East collections this volume illuminates the primary themes within these galleries: make, settle, connect, organize and believe and provides a larger context within which to understand them. The ancient Middle East is home to the first urban settlements in human history dating to the fourth millennium BCE therefore tracing this move toward city life figures prominently in the book. The topic of urbanization how it came about and how these early steps still impact our daily lives is explored from regional and localized perspectives bringing us from Mesopotamia Ur Uruk and Nippur to Islamic and Persianate cities Rayy and Isfahan and finally connecting back to life in modern Philadelphia. Through examination of topics such as landscape resources trade religious belief and burial practices daily life and nomads this very important human journey is investigated both broadly and with specific case studies.
