[The BIM Manager's Handbook](#) Dominik Holzer, 2016-05-02 *The BIM Manager's Handbook: Guidance for Professionals in Architecture, Engineering, and Construction*. Building Information Modelling (BIM) is a design and construction software that manages not just graphics but also information that enables the automatic generation of drawings and reports, design analysis, schedule simulation, facilities management, and cost analysis, ultimately enabling any building team to make better informed decisions. This allows a range of professionals: architects, engineers, construction managers, surveyors, cost estimators, project managers, and facility managers to share this information throughout a building's lifecycle. BIM is now recognized worldwide for the

efficiencies it delivers in terms of working collaboratively communication processes cost savings and a property's lifecycle management With the widespread adoption of BIM BIM Managers have become a much needed new breed of professionals in architectural engineering and construction practice Their role is often misunderstood and ill defined and such are the day to day deliverables that they are likely to face The BIM Manager's Handbook provides an in depth account of the breadth of activities that any BIM Manager or staff member who is actively engaged in the delivery of project is required to undertake Providing prereleases of the final work The BIM Manager's Handbook ePart series isolates significant topics around BIM management In the sixth and final ePart BIM is taken to the next level by outlining what is required to truly excel as a BIM Manager It highlights how BIM Managers acquire the necessary communication skills to maximize an efficient information flow between the BIM Manager and others It illustrates how BIM Managers tie their activities to cutting edge BIM research and development globally Lastly this ePart lays out how to promote BIM excellence both within an organization and beyond

The BIM Manager's Handbook, Part 4 Dominik Holzer, 2015-08-21 ePart 4 Building up a BIM Support Infrastructure Addressing the back of house aspect of BIM Management this ePart outlines how to go about developing a range of in house BIM standards and guidelines It highlights how BIM Managers go about establishing a training programme for staff and the setting up and management of an organisation's BIM content library It covers the support needed to move BIM information into the field and further into facilities and asset management It emphasises the importance of internal messaging and articulating how to nurture a culture of peer to peer support and advancement of skills by individual staff members Looking beyond a single firm's or organisation's requirements the ePart positions BIM support infrastructure in the wider context of key global BIM policies and guidelines Obook ISBN 9781118987896 ePub ISBN 9781118987919 ePDF ISBN 9781118987834 published August 2015
