Hyper-Exploitation in the Hacker Movement Yilmaz Aliskan, 2023-09-05 In this book Yilmaz Aliskan discusses the capitalist exploitation of digital media and examines how free time and creativity can be exploited in open source communities with corporations often benefiting from community generated knowledge Focusing on open source hardware communities in which hackers give up a considerable amount of free time and creativity to create open technology Aliskan investigates how free time becomes a hyper exploited commodity from which capital is increasingly accumulated Whereas paid workers are still often exploited Aliskan posits that open source workers are further hyper exploited by technology companies as they receive no compensation for their labour Ultimately this book reveals how the time and activity of volunteers in open source communities are ripe for capitalist exploitation that blurs the line between leisure and work time often disguised by assertions that such labour is fun or in line with volunteers personal interests or values Scholars of communication digital media sociology and labour studies will find this book of particular interest

Additive Manufacturing Technologies and Applications Salvatore Brischetto, Paolo Maggiore, Carlo Giovanni Ferro, 2018-07-09 This book is a printed edition of the Special Issue Additive Manufacturing Technologies and Applications that was published in Technologies

Proceedings of the International Conference on Information Technology & Systems (ICITS 2018) Álvaro Rocha, Teresa Guarda, 2018-01-04 This book includes a selection of articles from the 2018

International Conference on Information Technology organizational models and information systems software and systems modeling software systems architectures applications and tools multimedia systems and applications computer networks mobility and pervasive systems intelligent and decision support systems big data analytics and applications human computer interaction ethics computers health informatics and information technologies in education *Creating a Teacher Collective* Maria Impedovo, Karen Ferreira-Meyers, Noriyuki Inoue, 2023-06-05 The present book addresses the following challenge How do we create and sustain a teacher community For practitioners the main question in this handbook is How do we build and facilitate teacher communities The different chapters discuss teacher interaction for learning and professional development in light of three constructs the group the community and the network There is a wealth of literature especially on theoretical frameworks success factors and barriers to participation in teacher communities However this book addresses the need for a step by step guide with valuable suggestions for those who want to create from scratch and support a community of teachers brought together to deal with specific issues and importantly mediated by educational technology *Co-Creation* Tobias Redlich, Manuel Moritz, Jens P. Wulfsberg, 2018-11-19 Across several industries we are observing a paradigm shift from traditional firm centric and top down value creation to more open and collaborative approaches also referred to as bottom up economics The boundaries of firms dissolve and external actors customers user suppliers etc enter the domain of value creation by means of advanced information and communication technologies These new and evolving patterns require a renewed and interdisciplinary understanding of how co creation enables organizations to reshape business and society With contributions from industrial and academic experts this book provides deep insights into the theory and practice of bottom up economics and addresses the major opportunities and challenges that have emerged in the era of co creation A must read for decision makers looking to innovate their companies business models from ideation to marketing Dr Ing Michaela Colla K GXI Leader Industry 4 0 at Volkswagen Simply put co creation is the future of work With technology morphing the way we work and young people wanting to tackle problems that matter co creation is the sandbox where the world can come together to solve big challenges Plus co creation rapidly delivers products with built in market fit Megan Brewster Vice President of Advanced Manufacturing at Launch Forth Successful leaders will co create the future This book is an excellent starting point J rgen Bilo Managing Director co pace GmbH The Startup Organisation of Continental AG 3D Printing and Intellectual Property Lucas S. Hernández, G. Marseglia, 2021-07-26 Structural Studies Repairs and Maintenance of Heritage Architecture XVII The importance of retaining the built cultural heritage cannot be overstated Rapid development and inappropriate conservation techniques are threatening many heritage unique sites in different parts of the world Selected papers presented at the 17th International Conference on Studies Repairs and Maintenance of Heritage

Architecture are included in this volume They address a series of topics related to the historical aspects and the reuse of heritage buildings as well as technical issues on the structural integrity of different types of buildings such as those constructed with materials as varied as iron and steel concrete masonry wood or earth Restoration processes require the appropriate characterisation of those materials the modes of construction and the structural behaviour of the building This knowledge can be gained through a series of material characterisation techniques preferably via non destructive tests Modern computer simulation can provide accurate results demonstrating the stress state of the building and possible failure mechanisms affecting its stability Of particular importance are studies related to their dynamic and earthquake behaviour aiming to provide an assessment of the seismic vulnerability of heritage buildings Contributions originate from scientists architects engineers and restoration experts from all over the world and deal with different aspects of heritage buildings including how to formulate regulatory policies to ensure effective ways of preserving the architectural heritage Earthquake Resistant Engineering Structures XIII Papers presented at the 13th International Conference on Earthquake Resistant Engineering Structures form this volume and cover basic and applied research in the various fields of earthquake engineering relevant to the design of structures Major earthquakes and associated effects such as tsunamis continue to stress the need to carry out more research on those topics The problems will intensify as population pressure results in buildings in regions of high seismic vulnerability A better understanding of these phenomena is required to design earthquake resistant structures and to carry out risk assessments and vulnerability studies The problem of protecting the built environment in earthquake prone regions involves not only the optimal design and construction of new facilities but also the upgrading and rehabilitation of existing structures including heritage buildings The type of highly specialized retrofitting employed to protect the built heritage is an important area of research The included papers cover such topics as Seismic hazard and tsunamis Building performance during earthquakes Structural vulnerability Seismic isolation and energy dissipation Passive earthquake protection systems

Entrepreneurship in Innovation Communities Jan-Peter Ferdinand, 2017-09-27 Drawing on empirical insights from the field of desktop 3D printing this book elaborates the concept of innovation communities as a pattern of open and distributed innovation As these communities spur a fruitful exchange of explorative open source knowledge they represent a novel mode of doing innovation which considerably differs from established practices in market and business realms Hence the people that participate in these collective endeavors often develop entrepreneurial ambitions and start to exploit community based innovations commercially The book presents deep insights on the institutional idiosyncrasies of innovation communities the associated dilemma of entrepreneurship and the strategies of 3D printing startups to face the corresponding challenges

Social Robots from a Human Perspective Jane Vincent, Sakari Taipale, Bartolomeo Sapio, Giuseppe Lugano, Leopoldina Fortunati, 2015-05-08 This book presents a comprehensive overview of the human dimension of social robots by discussing both transnational features and national

peculiarities Addressing several issues that explore the human side of social robots this book investigates what a social robot is and how we might come to think about social robots in the different areas of everyday life Organized around three sections that deal with Perceptions and Attitudes to Social Robots Human Interaction with Social Robots and Social Robots in Everyday Life it explores the idea that even if the challenges of robot technologies can be overcome from a technological perspective the question remains as to what kind of machine we want to have and use in our daily lives Lessons learned from previous widely adopted technologies such as smartphones indicate that robot technologies could potentially be absorbed into the everyday lives of humans in such a way that it is the human that determines the human machine interaction In a similar way to how today's information and communication technologies were initially designed for professional industrial use but were soon commercialized for the mass market and then personalized by humans in the course of daily practice the use of social robots is now facing the same revolution of domestication In the context of this transformation which involves the profound embedding of robots in everyday life the human aspect of social robots will play a major part This book sheds new light on this highly topical issue one of the central subjects that will be taught and studied at universities worldwide and that will be discussed widely publicly and repeatedly in the near future

The Top Books of the Year Building Open Source Hardware Diy Manufacturing For Hackers And Makers The year 2023 has witnessed a remarkable surge in literary brilliance, with numerous compelling novels captivating the hearts of readers worldwide. Lets delve into the realm of top-selling books, exploring the captivating narratives that have enthralled audiences this year. The Must-Read : Colleen Hoover's "It Ends with Us" This heartfelt tale of love, loss, and resilience has captivated readers with its raw and emotional exploration of domestic abuse. Hoover skillfully weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can succeed. Uncover the Best : Taylor Jenkins Reid's "The Seven Husbands of Evelyn Hugo" This captivating historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reid's compelling storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. Discover the Magic : Delia Owens' "Where the Crawdads Sing" This mesmerizing coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens weaves a tale of resilience, survival, and the transformative power of nature, captivating readers with its evocative prose and mesmerizing setting. These top-selling novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of compelling stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a brilliant and thrilling novel that will keep you guessing until the very end. The novel is a cautionary tale about the dangers of obsession and the power of evil.
