Algorithmics of Nonuniformity Micha Hofri,Hosam Mahmoud,2018-07-16 Algorithmics of Nonuniformity is a solid presentation about the analysis of algorithms and the data structures that support them Traditionally algorithmics have been approached either via a probabilistic view or an analytic approach The authors adopt both approaches and bring them together to get the best of both worlds and benefit from the advantage of each approach The text examines algorithms that are designed to handle general data sort any array find the median of any numerical set and identify patterns in any setting At the same time it evaluates average performance typical behavior or in mathematical terms the expectations of the random variables that describe their operations Many exercises are presented which are essential since they convey additional material complementing the content of the chapters For this reason the solutions are more than mere answers but explain and expand upon related concepts and motivate further work by the reader Highlights A unique book that merges probability with analysis of algorithms Approaches analysis of algorithms from the angle of uniformity Non uniformity makes more realistic models of real life scenarios possible Results can be applied to many applications Includes many exercises of various levels of difficulty About the Authors Micha Hofri is a Professor of Computer Science and former department head at Worcester

Polytechnic Institute He holds a Ph D of Industrial Engineering 1972 all from Technion the Israel Institute of Technology He has 39 publications in Mathematics Hosam Mahmoud is a Professor at the Department of Statistics at George Washington University in Washington D C where he used to be the former chair He holds an Ph D in Computer Science from Ohio State University He is on the editorial board of five academic journals **Additive Combinatorics** Bela Bajnok,2018-04-27
