Beginning Google Maps Api 3 Experts Voice In Web Development Paperback Common:

Beginning Google Maps API 3 Gabriel Svennerberg, 2010-09-08 This book is about the next generation of the Google Maps API. It will provide the reader with the skills and knowledge necessary to incorporate Google Maps version 3 on web pages in both desktop and mobile browsers. It also describes how to deal with common problems that most map developers encounter at some point like performance and usability issues with having too many markers and possible solutions to that. Introduction to the Google Maps API version 3 Solutions to common problems most developers encounters too many markers common JavaScript pitfalls Best practices using HTML CSS JavaScript and Google Maps **Macworld**, 1991 **Beginning Google Maps Applications with PHP and Ajax** Jeffrey Sambells, Michael Purvis, Cameron Turner, 2007-12-22 Until recently building interactive web based mapping applications has been a cumbersome affair. This changed when Google released its powerful Maps API. **Beginning Google Maps Applications with PHP and Ajax** was written to help you take advantage of this technology in your own endeavors whether you're an enthusiast playing for fun or a professional building for profit. This book covers version 2 of the API including Google's new Geocoding service. Authors Jeffrey Sambells, Cameron Turner and Michael Purvis get rolling with examples that require hardly any code at all but you'll quickly become acquainted with many facets of the Maps API. They demonstrate powerful methods for simultaneously plotting large data sets, creating your own map overlays and harvesting and geocoding sets of addresses. You'll see how to set up alternative tile sets and where to access imagery to use for them. The authors even show you how to build your own geocoder from scratch for those high volume batch jobs. As well as providing hands-on examples of real mapping projects, this book supplies a complete reference for the Maps API along with the relevant aspects of JavaScript, CSS, PHP and SQL. Visit the authors' website for additional tips and advice. **Beginning Google Maps Applications With Php And Ajax: From Novice To Professional** Purvis, 2007-01-01

Beginning Google Web Toolkit Bram Smeets, Uri Boness, Roald Bankras, 2008-10-21 The open source lightweight Google Web Toolkit (GWT) is a framework that allows Java developers to build rich Internet applications (RIAs) more recently called Ajax applications in Java. Typically, writing these applications requires a lot of JavaScript development. However, Java and JavaScript are very distinctively different languages, although the name suggests otherwise, therefore requiring a different development process. In **Beginning Google Web Toolkit From Novice to Professional**, you'll learn to build rich user-friendly web applications using a popular Java-based Ajax web framework, the Google Web Toolkit. The authors will guide you through the complete development of a GWT front-end application with a no-nonsense, down-to-earth approach. You'll start with the first steps of working with GWT and learn to understand the concepts and consequences of building this kind of application. During the course of the book, all the key aspects of GWT are tackled pragmatically as you're using them to build a real-world sample application. Unlike many other books, the inner workings of GWT and other unnecessary details are shelved so you can focus on the stuff that really matters when developing GWT applications. *Getting Around with Google*
