Beginnelsen Van Europees Constitutioneel Recht:

Beginnelsen van europees constitutioneel recht J. A. Hofman, Jan Willem Sap, I. Sewandono, 1996 *European Yearbook 1996* J. -P Chauvet, 1998-12-01 The European Yearbook promotes the scientific study of nineteen European supranational organisations including the Organisation for Economic Co operation and Development OECD Each volume contains a detailed survey of the history structure and yearly activities of each organisation and an up to date chart providing a clear overview of the member states of each organisation In addition a number of articles on topics of general interest are included in each volume A general index by subject and name and a cumulative index of all the articles which have appeared in the Yearbook are included in every volume and provide direct access to the Yearbook s subject matter Each volume contains a comprehensive bibliography covering the year s relevant publications This is an indispensable work of reference for anyone dealing with the European institutions *Europees recht : in hoofdlijnen* Koenraad Lenaerts, Piet Van Nuffel, 2003 *The Stateless Market* Paul Kapteyn, 2002-09-11 This book offers a broad view of the tension between state and market in the political evolution of the European Union Contemporary developments and issues are set within the historical context of state formation Paul Kapteyn argues that states are invariably formed by violent conquest or by fusion in the face of an external threat and that markets can emerge only when the state has been established He points out that while the histories of France Britain The Netherlands and Germany conform to these rules the European Union does not and he goes on to explore the reasons why this is not so and its implications The second section of the book is based on empirical research Paul Kapteyn underpins his theoretical and historical argument with an analysis of official documents newspaper articles and interviews with Eurocrats from the various member states He concentrates especially on two case studies of the Treaty of Schengen on judicial cooperation and harmonization and of the problem of EU fraud He also looks closely at the consequences of the Maastricht Treaty The Stateless Market is a thought provoking text ideally suited to students on European studies politics international relations and sociology courses it will also be of great interest to those professionally concerned with European integration **European Legal Book Index** , 1996 **Europees recht** Koenraad Lenaerts (jurist), 2007 Handboek EVRM: Algemene beginsels Johan Vande Lanotte, 2004 **Soft Law in European Community Law** Linda Senden, 2004-09-30 This book offers the first systematic investigation of the phenomenon of soft law within the framework of the EC the first pillar of the EU and its use by the European Commission and Council of Ministers It focusses upon how soft law fits into the Community legal system and how it is used and in particular how it relates to Community legislation Differentiation of the Community instruments including the instruments of soft law is often thought to enhance the effectiveness legitimacy and transparency of the Community This book asks whether soft law indeed provides a satisfactory alternative to legislation from this perspective and if so in what cases and under what conditions Furthermore the author asks to what extent the use of soft law implies good governance and throws fresh light on this very heterogeneous

phenomenon by looking at frequently used instruments in many different areas of Community law such as competition law state aid environment social policy etc in the process identifying their different characteristics aims functions and legal effects What emerges is that the conditions under which soft law is used may be problematic in relation to increasing the legitimacy effectiveness and transparency of Community action This is a work which will interest legal practitioners confronted with the use of soft law and the question of its possible legal effect in an increasing number of sectors and academics interested in the vexed question of how the increased use of soft law can be justified in a Community legal order built upon the rule of law It is also critical of developments taking place within the framework of the European Convention and the proposed European Constitution and goes beyond the immediate problems of soft law to touch upon issues such as competence legal protection division of powers between the EC and the Member States institutional balance lawmaking by the Community Courts the scope of Community legal principles and the influence of soft law on the progressive development of both Community and national law **Annuaire européen. 42.1994(1996)** Tsimaratos,P. nature as well as the practical quality of the information it provides make this book a valuable time saving tool for both practising and academic jurists Lawyers representing parties with interests in the Netherlands will welcome this guide and academics and researchers will appreciate its value in the study of comparative constitutional law The text of the Constitution for the Kingdom of the Netherlands and the text of the Charter for the Kingdom are included in this book
