Behaving Badly Social Panics And Moral Outrage Victorian And Modern Parallels:

Behaving Badly Judith Rowbotham, Kim Stevenson, 2003 *Behaving Badly* examines crime that was socially visible in contemporary social panics and moral outrage in both the Victorian period and the late twentieth century Through a series of interconnected case studies exploring the social and legal responses to such offending and their public presentation through popular reporting and the court system *Behaving Badly* highlights a series of apparent continuities as well as discontinuities in the making of legislation

Behaving Badly Judith Rowbotham, Kim Stevenson, 2017-03-02 Both the Victorian age and the late twentieth century are often characterised by contemporaries as times of apparent economic affluence and stability They are often depicted as periods that shared a conviction that the stability of society including its affluence was threatened by the activities of social deviants These essays aim to examine crime of a socially visible nature in the context of social panic and moral outrage in both the Victorian period and the late twentieth century Through a series of interconnected case studies exploring the social and legal responses to such offences and their public presentation through popular reporting and the court system a series of apparent continuities as well as discontinuities are highlighted in the making of legislation The innovative approach taken by the editors and contributors to concepts of crime and bad behaviour make this essential reading for academics and practitioners The interdisciplinary focus of the book allows it to locate the legal processes and system firmly within the socio cultural context instead of examining it as a discrete area of individual study making this text central to work in law criminology and social policy and history

The Routledge International Handbook on Fear of Crime Murray Lee, Gabe Mythen, 2017-12-01 *The Routledge International Handbook on Fear of Crime* brings together original and international state of the art contributions of theoretical empirical policy related scholarship on the intersection of perceptions of crime victimisation vulnerability and risk This is timely as fear of crime has now been a focus of scholarly and policy interest for some fifty years and shows little sign of abating Research on fear of crime is demonstrative of the inter

disciplinarity of criminology drawing in the disciplines of sociology psychology political science history cultural studies gender studies planning and architecture philosophy and human geography This collection draws in many of these interdisciplinary themes This collections also extends the boundaries of fear of crime research It does this both methodologically and conceptually but perhaps more importantly it moves us beyond some of the often repeated debates in this field to focus on novel topics from unique perspectives The book begins by plotting the history of fear of crime s development then moves on to investigate the methodological and theoretical debates that have ensued and the policy transfer that occurred across jurisdictions Key elements in debates and research on fear of crime concerning gender race and ethnicity are covered as are contemporary themes in fear of crime research such as regulation security risk and the fear of terrorism the mapping of fear of crime and fear of crime beyond urban landscapes The final sections of the book explore geographies of fear and future and unique directions for this research

Moral Panics and the Copyright Wars William Patry, 2009-09-03 Metaphors moral panics folk devils Jack Valenti Joseph Schumpeter John Maynard Keynes predictable irrationality and free market fundamentalism are a few of the topics covered in this lively unflinching examination of the Copyright Wars the pitched battles over new technology business models and most of all consumers In *Moral Panics and the Copyright Wars* William Patry lays bare how we got to where we are a bloated punitive legal regime that has strayed far from its modest but important roots Patry demonstrates how copyright is a utilitarian government program not a property or moral right As a government program copyright must be regulated and held accountable to ensure it is serving its public purpose Just as Wall Street must serve Main Street neither can copyright be left to a Reaganite magic of the market The way we have come to talk about copyright metaphoric language demonizing everyone involved has led to bad business and bad policy decisions Unless we recognize that the debates over copyright are debates over business models we will never be able to make the correct business and policy decisions A centrist and believer in appropriately balanced copyright laws Patry concludes that calls for strong copyright laws just like calls for weak copyright laws miss the point entirely the only laws we need are effective laws laws that further the purpose of encouraging the creation of new works and learning Our current regime unfortunately creates too many bad incentives leading to bad conduct Just as President Obama has called for re tooling and re imagining the auto industry Patry calls for a remaking of our copyright laws so that they may once again be respected

Financial Crimes: Psychological, Technological, and Ethical Issues Michel Dion, David Weisstub, Jean-Loup Richet, 2016-06-08 This book on the psychology of white collar criminals discusses various cases of financial crime while also attempting to delve into the minds of the criminals in question The literature on this topic is growing as it gains momentum in the scientific field as a result of the extremely negative impact white collar crime has on its victims Because there is considerable damage and vulnerability from these crimes it is important to begin to classify them and to understand the minds of those that commit these offenses While the current literature is not extensive this work

provides a closer look into the various ethical and legal facets of financial crime and helps to uncover the social psychological and neurobiological factors that intersect in the minds of those criminals

Mapping Transatlantic Security Relations

Mark B. Salter, 2010-04-15 This book examines how legal political and rights discourses security policies and practices migrate and translate across the North Atlantic The complex relationship between liberty and security has been fundamentally recast and contested in liberal democracies since the start of the global war on terror In addition to recognizing new agencies political pressures and new sensitivities to difference it is important that not to over state the novelty of the post 9 11 era the war on terror simply made possible the intensification expansion or strengthening of policies already in existence or simply enabled the shutting down of debate Working from a common theoretical frame if different disciplines these chapters present policy oriented analyses of the actual practices of security policing and law in the European Union and Canada They focus on questions of risk and exception state sovereignty and governance liberty and rights law and transparency policing and security In particular the essays are concerned with charting how policies practices and ideas migrate between Canada the EU and its member states By taking field approach to the study of security practices the volume is not constrained by national case study or the solipsistic debates within subfields and bridges legal political and sociological analysis It will be of much interest to students of critical security studies sociology law global governance and IR in general Mark B Salter is Associate Professor at the School of Political Studies University of Ottawa

The Female Body

in Medicine and Literature Andrew Mangham, Greta Depledge, 2013-08-15 Drawing on a range of texts from the seventeenth century to the present The Female Body in Medicine and Literature explores accounts of motherhood fertility and clinical procedures for what they have to tell us about the development of women s medicine The essays here offer nuanced historical analyses of subjects that have received little critical attention including the relationship between gynecology and psychology and the influence of popular art forms on so called women s science prior to the twenty first century Taken together these essays offer a wealth of insight into the medical treatment of women and will appeal to scholars in gender studies literature and the history of medicine

Criminal Conversations Judith Rowbotham, Kim Stevenson, 2005

The essays in this book set out to explore the ways in which Victorians used newspapers to identify the causes of bad behavior and its impacts and the ways in which they tried to distance criminals and those guilty of bad behavior from the ordinary members of society including identification of them as different according to race of sexual orientation It also explores how threats from within normal society were depicted and the panic that issues like baby farming caused Victorian alarm was about crimes and bad behavior which they saw as new or unique to their period but which were not new then and which in slightly different dress are still causing panic today What is striking about the essays in this collection are the ways in which they echo contemporary concerns about crime and bad behavior including panics about new types of crime This has implications for modern understandings of how society needs to understand crime demonstrating that while there are
