Michele Grigsby Coffey,Jodi Skipper,2017-08 The work of considering imagining and theorizing the U S South in regional national and global contexts is an intellectual project that has been going on for some time Scholars in history literature and other disciplines have developed an advanced understanding of the historical social and cultural forces that have helped to shape the U S South However most of the debates on these subjects have taken place within specific academic disciplines with few attempts to cross engage Navigating Souths broadens these exchanges by facilitating transdisciplinary conversations about southern studies scholarship The fourteen original essays in Navigating Souths articulate questions about the significances of the South as a theoretical and literal home base for social science and humanities researchers They also examine challenges faced by researchers who identify as southern studies scholars as well as by those who live and work in the regional South and show how researchers have responded to these challenges In doing so this book project seeks to reframe the field of southern studies as it is currently being practiced by social science and humanities scholars and thus reshape historical and cultural conceptualizations of the region Sacred Worlds Chris Park,2002-11-01 This book the first

in the field for two decades looks at the relationships between geography and religion It represents a synthesis of research by geographers of many countries mainly since the 1960s No previous book has tackled this emerging field from such a broad interdisciplinary perspective and never before have such a variety of detailed case studies been pulled together in so comparative or illuminating a way Examples and case studies have been drawn from all the major world religions and from all continents from both a historical and contemporary perspective Major themes covered in the book include the distribution

of religion and the processes by which religion and religious ideas spread through space and time Some of the important links between religion and population are also explored A great deal of attention is focused on the visible manifestations of religion on the cultural landscape including landscapes of worship and of death and the whole field of sacred space and religious pilgrimage
