Breaking Down Barriers To Care Treatment Of Tobacco Dependence In Vulnerable Populations:

Breaking Down Barriers to Care John E. Snyder, Megan J. Engelen, 2010 Although entirely preventable smoking is one of the most common causes of morbidity and mortality in the United States As a result it creates a significant financial burden on the health care system In the text the authors first present an evidence based approach for providers that helps identify the most at risk patients They then offer specific clinical strategies for approaching tobacco cessation which are proven to be the most effective in overcoming the existing cultural or systematic barriers Lastly the authors propose a number of health policy recommendations which can assist with breaking down barriers to care for each cultural group and result in more effective cessation programs on the population level

Treating Addiction to Tobacco and Nicotine Products Jill M. Williams, Jonathan Foulds, 2024-12-03 Synthesizing the latest research and literature Treating Addiction to Tobacco and Nicotine Products provides a comprehensive analysis of assessing and treating tobacco use disorder Smoking rates have declined for decades yet smoking remains the leading cause of preventable death in the United States responsible for more 400 000 premature deaths annually in this country and more than 4 9 million deaths worldwide Featuring numerous case vignettes that bring the topics to life this volume covers Trends in cigarette smoking and its associated harms Patterns of use addictiveness and health effects of non cigarette tobacco products including e cigarettes cigars and pipes Assessing tobacco use disorder Behavioral and pharmacological interventions for tobacco use disorder The need for systems change in health care settings Special emphasis is placed on individuals with mental illness who are disproportionately represented among users of tobacco products The book explores tobacco use in this population and explains the impact of this comorbidity on treatment and cessation With summary key points at the end of each chapter to distill clinical highlights Treating Addiction to Tobacco and Nicotine Products is an essential resource for busy clinicians across various health care disciplines

Smoking and Schizophrenia David Castle,Amanda Baker,Billie Bonevski,2020-01-03

LGBT Populations and Cancer in the Global Context Ulrike Boehmer,Gabriele Dennert,2022-08-21 Lesbian Gay Bisexual and Transgender LGBT also known as sexual and gender minority SGM populations have been the focus of global attention Most importantly LGBT populations have been addressed in the context of human rights in multiple reports and other activities by the United Nations and other international organizations There is great variation among countries in the recognition of LGBT individuals human rights A global focus on LGBT populations health is still limited with the notable exception of HIV research This book on LGBT populations and cancer in the global context is therefore an important step in that it will broaden the focus on LGBT populations health

Globally cancer is the second leading cause of death. Cancer morbidity and mortality are increasing disproportionately among populations in lower income countries. A review conducted by the World Health Organization (WHO) found that of the 82% of member states (158 countries), only 35% of the national cancer control plans addresses vulnerable populations including LGBT populations. These findings reflect an increasing awareness about equity when addressing cancer prevention and control including LGBT populations. This book addresses LGBT populations' cancer burden across countries that range from high to low income countries to support efforts in diverse countries that are working towards reducing LGBT populations' cancer burden. It documents place-specific challenges that impede progress towards reducing the LGBT cancer burden as well as critically assesses the variation in cancer control efforts that target LGBT populations and cancer to support progress at a global scale. This book includes six sections that cover the six WHO regions, with each chapter written by an author from the specific region s/he is covering. Each chapter makes use of a template that contextualizes the region's local data collection availability, risk factors, cancer prevention, detection, diagnosis, treatment, and survivorship.
