*Behind the Postmodern Facade* Magali Sarfatti Larson, 2018-08-14 Magali Larson's comprehensive study explores how architecture happens and what has become of the profession in the postmodern era. Drawing from extensive interviews with pivotal architects from Philip Johnson who was among the first to introduce European modernism to America to Peter Eisenman identified with a new deconstructionist style she analyzes the complex tensions that exist between economic interest, professional status, and architectural product. She investigates the symbolic awards and recognition accorded by prestigious journals and panels exposing the inner workings of a profession in a precarious social position. Larson captures the struggles around status, place, and power as architects seek to redefine their very purpose in contemporary America. The author's novel approach in synthesizing sociological research and theory proposes nothing less than a new cultural history of architecture. This is a ground-breaking contribution to the study of culture and the sociology of knowledge as well as to architectural and urban history. This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice, reach, and impact. Drawing on a backlist dating to 1893, Voices Revived makes high-quality peer-reviewed scholarship accessible once again using print-on-demand technology. This title was originally published in 1993 with a paperback edition in 1995. **Behind the**

Wagner, 2009 This collection of papers addresses two questions central to design and historic preservation: what are the parameters of compatibility in the design of additions to historic buildings and of new infill buildings in historic districts and landscapes. Presented at the Third National Forum on Historic Preservation Practice: A Critical Look at Design in

Historic Preservation held at Goucher College the authors include practicing and academic historic preservationists architectural historians architects landscape architects and engineers Organized under the themes of Melding Contemporary and Historic Design Design Standards in Changing Environments Modernism and Post modernism in Preservation Design and Engineering and Preservation issues of compatibility are explored through diverse projects in locations across the United States from historic Charleston SC to downtown Los Angeles

*The Favored Circle* Garry Stevens, 2002-02-22 A look at the field of architecture written by an outsider who demystifies the mechanics of fame and fortune The popular view of architecture focuses on individual creative geniuses those who have designed the most significant works According to Garry Stevens however successful architects owe their success not so much to genius as to social background and a host of other factors that have very little to do with native talent To concentrate only on the profession of architecture is to ignore the much larger field of architecture which structures the entire social universe of the architect and of which architects are only one part This book critically surveys that field exposing many myths and debunking a number of heroes in the process Using the conceptual apparatus of French sociologist Pierre Bourdieu Stevens describes the field of architecture on two levels First he provides a detailed account of the field as it is at any given point in time describing the different components and their relationships Second he analyzes the dynamics of the field through time from the Renaissance to the present He discusses the system of architectural education as well as everyday aspects such as the competition for reputation He concludes that throughout history the most eminent architects have been connected to each other by master pupil and collegiate relations These networks which still exist provide a mechanism for architectural influence that runs parallel to that of the university based schools

**Makers of 20th-Century Modern Architecture** Donald Leslie Johnson, Donald Langmead, 2013-05-13 Makers of 20th Century Modern Architecture is an indispensable reference book for the scholar student architect or layman interested in the architects who initiated developed or advanced modern architecture The book is amply illustrated and features the most prominent and influential people in 20th century modernist architecture including Wright Eisenman Mies van der Rohe and Kahn It describes the milieu in which they practiced their art and directs readers to information on the life and creative activities of these founding architects and their disciples The profiles of individual architects include critical analysis of their major buildings and projects Each profile is completed by a comprehensive bibliography

**In Defense of Disciplines** Jerry A. Jacobs, 2014-02-05 Calls for closer connections among disciplines can be heard throughout the world of scholarly research from major universities to the National Institutes of Health In Defense of Disciplines presents a fresh and daring analysis of the argument surrounding interdisciplinarity Challenging the belief that blurring the boundaries between traditional academic fields promotes more integrated research and effective teaching Jerry Jacobs contends that the promise of interdisciplinarity is illusory and that critiques of established disciplines are often overstated and misplaced Drawing on diverse sources of data Jacobs offers a new theory of liberal arts disciplines such as biology economics and history that

identifies the organizational sources of their dynamism and breadth Illustrating his thesis with a wide range of case studies including the diffusion of ideas between fields the creation of interdisciplinary scholarly journals and the rise of new fields that spin off from existing ones Jacobs turns many of the criticisms of disciplines on their heads to mount a powerful defense of the enduring value of liberal arts disciplines This will become one of the anchors of the case against interdisciplinarity for years to come

**Monospace and Multiverse** Sabine Hansmann,2020-12-07 In contrast to buildings divided by walls monospace buildings are determined far less by its shell than by a reciprocal relationship between space and practices objects materials and human bodies Using the example of such one room architectures this book explores the potential of an actor network theory ANT approach to space in the field of architecture Sabine Hansmann focuses on the Sainsbury Centre for Visual Arts in Norwich England by Foster Associates 1978 to investigate the mutual entanglement of people objects and building She traces the work that is necessary in doing space and thus suggests a re conceptualisation of space in architectural theory

**American Architects and Texts** Juan Pablo Bonta,1996 In this volume the author analyzes 400 architectural books and articles published over the past 150 years to reveal changing societal preferences in architecture and to measure the reputations of individual architects the text includes a ranked list of the 100 most famous architects
