## **Beholden Religion Global Health And Human Rights:**

*Beholden* Susan R. Holman, 2015 Winner of the 2016 Grawemeyer Award in Religion Global health efforts today are usually shaped by two very different ideological approaches a human rights based approach to health and equity often associated with public health medicine or economic development activities or a religious or humanitarian aid approach motivated by personal beliefs about charity philanthropy missional dynamics and humanitarian mercy The underlying differences between these two approaches can create tensions and even outright hostility that undermines the best intentions of those involved In *Beholden Religion Global Health and Human Rights* Susan R Holman a scholar in both religion and the history of medicine challenges this traditional polarization by telling stories designed to help shape a new perspective on global health one that involves a multidisciplinary integration of religion and culture with human rights and social justice The book's six chapters range broadly describing pilgrimage texts in the Christian Hindu Buddhist and Islamic traditions the effect of ministry and public policy on nineteenth century health care for the poor the story of the Universal Declaration of Human Rights as it shaped economic social and cultural rights a religious health assets approach based in Southern Africa and the complex dynamics of gift exchange in the modern faith based focus on charity community and the common good Holman's study serves as an insightful guide for students and practitioners interested in improving and broadening the scope of global health initiatives with an eye towards having the greatest impact possible *Christianity's Role in United States Global Health and Development Policy* John Blevins, 2018-07-06 In recent years the role of religion in influencing international health policy and health services provision has been seen as increasingly important This book provides a social history of the relationship between religion and America's international health policy and practice from the latter 19th century to the present The book demonstrates that the fields of religion and public health have distinct moral frameworks each with their own rationales assumptions and motivations While these two frameworks share significant synergies substantial tensions also exist which are negotiated in political contexts The book traces the origins of religion's influence on public health to the Progressive Era in the latter half of the 19th century examines tensions that arose in the first half of the 20th century describes the divorce between religion and international health from the 1940s through the 1980s identifies the sources of the renewed interest in the relationship between religion and international health and anticipates the future contours of religion and international health in light of contemporary political and economic forces While the influence of religion on international health practice and policy in the United States serves as the focus of the book the effects of US policies on international health policies in general are also explored in depth especially in the book's later chapters This ambitious study of religion's social history in the United States over the last 150 years will be of interest to researchers in global health politics religion and development studies *Power, Suffering, and the Struggle for Dignity* Alicia Ely Yamin, 2016 *Power Suffering and the Struggle for Dignity* provides a solid foundation for comprehending what a

human rights framework implies and the potential for greater justice in health it entails      **Lived Theology** Charles Marsh, Peter Slade, Sarah Azaransky, 2017 The lived theology movement is built on the work of an emerging generation of theologians and scholars who pursue research teaching and writing as a form of public discipleship motivated by the conviction that theology can enhance lived experience This volume based on a two year collaboration with the Project on Lived Theology at the University of Virginia offers a series of illustrations and styles of lived theology in conversation with other major approaches to the religious interpretation of embodied life      *Handbook of African Development* Tony Binns, Kenneth Lynch, Etienne Nel, 2018-04-27 This handbook presents an extensive new overview of African development past present and future It addresses key core themes and topics that are pertinent to the continent's development including sections on history health and food politics economics rural and urban development and development policy and practice The volume draws on the expertise of over 60 of the world's leading scholars to provide a detailed and up to date analysis of the key opportunities and challenges that confront Africa and how such issues are being addressed Arranged by key themes the handbook provides not only a historical understanding of the past but also political perspectives on the future The chapters provide critically informed analyses of their topics by drawing upon the latest conceptual viewpoints and applied experiences in Africa in the form of case studies to offer a comprehensive examination of the opportunities challenges key debates and future prospects This handbook is an invaluable state of the art overview and reference concerning many different aspects of Africa's development which will be of interest to academics in all fields of African studies and also academics and students working in cognate disciplines such as development studies geography history politics and economics      *The Faiths of Others* Thomas Albert Howard, 2021-05-25 The first intellectual history of interreligious dialogue a relatively new and significant dimension of human religiosity In recent decades organizations committed to interreligious or interfaith dialogue have proliferated both in the Western and non Western worlds Why How so And what exactly is interreligious dialogue These are the touchstone questions of this book the first major history of interreligious dialogue in the modern age Thomas Albert Howard narrates and analyzes several key turning points in the history of interfaith dialogue before examining in the conclusion the contemporary landscape While many have theorized about and practiced interreligious dialogue few have attended carefully to its past connecting its emergence and spread with broader developments in modern history Interreligious dialogue grasped in light of careful critical attention to its past holds promise for helping people of diverse faith backgrounds to foster cooperation and knowledge of one another while contributing insight into contemporary global religious pluralism      *The Spirit of Global Health* Simon Peng-Keller, Fabian Winiger, Raphael Rauch, 2022 Since the beginning of the World Health Organization many of its staff members regional offices member states and directors general have grappled with the question of what a spiritual dimension of health looks like and how it might enrich the health policies advocated by their organisations Contrary to the wide spread perception that spirituality is primarily related to palliative

care and has emerged relatively recently within the organisation this study shows that its history is considerably longer and more complex and has been closely connected to the WHO's ethical aspirations its quest for more holistic and equitable healthcare and its struggle with the colonial legacy of international health organisations While such ideals and struggles silently motivated many of the key actors and policies such as the provision of universal primary healthcare which for decades have embodied the organisation's loftiest aspirations the WHO's official relationship with spirituality advanced in fits and starts At times creative and interdisciplinary at others deeply political this process was marked by cycles of institutional forgetting and remembering Rather than as a triumph of religious lobbyists this book argues the spiritual dimension of health may be better understood as a ghost that has haunted and continues to haunt the WHO as it comes to terms with its mandate of advancing health as a state of complete well being available to all

**Religion in Global Health and Development** Benjamin Bronnert Walker,2022-04-20 The COVID-19 pandemic has made evident that the field of global health its practices norms and failures has the power to shape the lives of billions Global health perspectives on the role of religion however are strikingly limited Uncovering the points where religion and global health have connected across the twentieth century focusing on Ghana provides an opportunity to challenge narrow approaches In Religion in Global Health and Development Benjamin Walker shows that the religious features of colonial state architecture were still operating by the turn of the twenty-first century Walker surveys the establishment of colonial development projects in the twentieth century with a focus on the period between 1940 and 1990 Crossing the colonial/postcolonial divide analyzing local contexts in conjunction with the many layers of international organizations and identifying surprisingly neglected streams of personnel and funding particularly from Dutch and West German Catholics this in-depth history offers new ways of conceptualizing global health Patchworks of international humanitarian intervention fragmented government services local communities and the actions of many foreign powers combined to create health services and the state in Ghana Religion in Global Health and Development shows that religion and religious actors were critical to this process socially culturally and politically

**Disability, Medicine, and Healing Discourse in Early Christianity** Susan R. Holman,Chris L. de Wet,Jonathan L. Zeicher,2023-08-04 Using

contemporary theories drawn from health humanities this volume analyses the nature and effects of disability medicine and health discourse in a variety of early Christian literature In recent years the medical turn in early Christian studies has developed a robust literature around health disability and medicine and the health humanities have made critical interventions in modern conversations around the aims of health and the nature of healthcare Considering these developments it has become clear that early Christian texts and ideas have much to offer modern conversations and that these texts are illuminated using theoretical lenses drawn from modern medicine and public health The chapters in this book explore different facets of early Christian engagement with medicine either in itself or as metaphor and material for theological reflections on human impairment restoration and flourishing Through its focus on late antique religious texts the book raises questions around the social rather than biological aspects of illness and diminishment as a human experience as well as the strategies by which that experience is navigated The result is an innovative and timely intervention in the study of health and healthcare that bridges current divides between historical studies and contemporary issues Taken together the book offers a prismatic conversation of perspectives on aspects of care at the heart of societal and individual wellness today inviting readers to meet or revisit patristic texts as tracings across a map of embodied identity dissonance and corporal care It is a fascinating resource for anyone working on ancient medicine and health or the social worlds of early Christianity
