Alison Laywine presents a new interpretation of one of the most famous texts in modern philosophy Kant s Transcendental Deduction in his Critique of Pure Reason She shows how Kant developed his view of a world as a whole unified by universal laws and his view of experience as the whole of all possible appearances unified by universal laws **Relational**

Intentionality: Brentano and the Aristotelian Tradition Hamid Taieb,2018-12-28 This book sheds new light on the history of the philosophically crucial notion of intentionality which accounts for one of the most distinctive aspects of our mental life the fact that our thoughts are about objects Intentionality is often described as a certain kind of relation Focusing

on Franz Brentano who introduced the notion into contemporary philosophy and on the Aristotelian tradition which was Brentano's main source of inspiration the book reveals a rich history of debate on precisely the relational nature of intentionality It shows that Brentano and the Aristotelian authors from which he drew not only addressed the question whether intentionality is a relation but also devoted extensive discussions to what kind of relation it is if any The book aims to show that Brentano distinguishes the intentional relation from two other relations with which it might be confused namely causality and reference which also hold between thoughts and their objects Intentionality accounts for the aboutness of a thought causality by contrast explains how the thought is generated and reference understood as a sort of similarity occurs when the object towards which the thought is directed exists Brentano claims to find some anticipation of his views in Aristotle This book argues that whether or not Brentano's interpretation of Aristotle is correct his claim is true of the Aristotelian tradition as a whole since followers of Aristotle more or less explicitly made some or all of Brentano's distinctions This is demonstrated through examination of some major figures of the Aristotelian tradition broadly understood including Alexander of Aphrodisias the Neoplatonic commentators Thomas Aquinas Duns Scotus and Francisco Suarez This book combines a *longue durée* approach focusing on the long term evolution of philosophical concepts rather than restricting itself to a specific author or period with systematic analysis in the history of philosophy By studying Brentano and the Aristotelian authors with theoretical sensitivity it also aims to contribute to our understanding of intentionality and cognate features of the mind

Disasters: Core Concepts and Ethical Theories Dónal P. O'Mathúna, Vilius Dranseika, Bert Gordijn, 2018-10-16 This Open Access Book is the first to examine disasters from a

multidisciplinary perspective Justification of actions in the face of disasters requires recourse both to conceptual analysis and ethical traditions Part 1 of the book contains chapters on how disasters are conceptualized in different academic disciplines relevant to disasters Part 2 has chapters on how ethical issues that arise in relation to disasters can be addressed from a number of fundamental normative approaches in moral and political philosophy This book sets the stage for more focused normative debates given that no one book can be completely comprehensive Providing analysis of core concepts and with real world relevance this book should be of interest to disaster scholars and researchers those working in ethics and political philosophy as well as policy makers humanitarian actors and intergovernmental organizations Concepts of Conversion
