Being And Authenticity Value Inquiry Book Series 149:

Being and Authenticity Xunwu Chen, 2021-12-28 This book presents a creative approach to the problem of individual authenticity What is authenticity What are its necessary conditions How is an authentic self possible in society What are the relationships of authenticity morality and happiness The book examines a wide range of questions in Eastern and Western thought to which it gives novel answers **The Philosophical Review** Jacob Gould Schurman, James Edwin

Creighton, Frank Thilly, Gustavus Watts Cunningham, 2004 **The Memory of Pain** Camila Loew, 2011 In this book Camila Loew analyzes four women's testimonial literary writings on the Holocaust to examine and question some of the tenets of the fields of Holocaust studies gender studies and testimony Through a close reading of the works of Charlotte Delbo Margarete Buber Neumann Ruth Kluger and Marguerite Duras Loew foregrounds these authors search for a written form to engage with their experiences of the extreme Although each chapter contains its individual focus and features the book possesses a unity in intention concerns and consequences In the theoretical introduction that unites the four chapters Loew eschews essentialism and revises the emergence of the field of Women and Holocaust studies from the early 1980s on and signals some of its shortcomings In response and in accordance with a recent turn in various disciplines of the Humanities Loew highlights the ethical dimension of testimony and its responsible commitment to the other In dealing with the texts as literary testimonies a complex genre between literature and history testimony is freed from the obligation to respond to the requirements of factual truth and becomes a privileged form to voice the traumatic event and to symbolically explore the role of excess **Sex, Love, and Friendship** Adrienne Leigh McEvoy, 2011-08 The joke is that all the prostitutes go on vacation when the philosophers come to town The reason that the other conventioners do it philosophers just talk about it And talk about sex and love and friendship is what the contributors to this volume do They talk and argue split hairs and clarify all trying to advance our understanding of this most interesting practice of the human species Some of the best minds on three continents from four nations and eighteen of the United States discuss such topics as adultery commitment cross dressing gender politics date rape family friendship friends as lovers gayness love marital pluralism marriage prostitution religiously motivated anti queer sentiments same sex marriage seduction and self respect Rather than preach participants probe our attitudes and practices involving these issues with the aim of better understanding the broad range of sexual practices of our species The result is a collection of stimulating essays that can enliven class discussions as well as provide guidance for the sexually perplexed The work is accessible to readers from high school through college and beyond **Defining**

Personhood Sarah Bishop Merrill, 2021-11-15 Many debates in biomedical ethics today involve inconsistencies in defining the key term person Both sides of the abortion debate for instance beg the question about what constitutes personhood This book explores the arguments concerning definitions of personhood in the history of modern philosophy and then constructs a superior model defined in terms of distinctive features a theoretical concept borrowed from linguistics This model is shown to

have distinct advantages over the necessary and sufficient condition models of personhood launched by essentialists. Philosophers historically have been correct about what some of the pivotal distinctive features of personhood are: equality, rationality, communications, and self-consciousness, but they have been wrong about the methods of recognizing and asserting personhood and about the relative importance of feelings. In clinical care, complaints often surface that care is not personal. This book aims to improve care through providing a method of attending to patients as people. Charts in the Appendices show that where physicians attended to personal features important to their patients, sometimes the patients rated the care even higher than the physician did. The book will be useful to health care providers whose goals include improving quality of care, listening to patients, and preventing malpractice.

Queer Philosophy Raja Halwani, Carol Viola Anne Quinn, Andy Wible, 2012. The book is a collection of the presentations of the Society for Lesbian and Gay Philosophy from 1998 to 2008. The essays are organized historically, starting in 1998. Their topics cover virtually every philosophical field, and such that each is connected to gay and lesbian studies. Topics include how we are to understand sexual orientation, whether same sex leads to polygamy, teaching gay studies to undergraduates, promiscuity and virtue, the war on terror and gay oppression, the rationality of coming out, the ethics of outing, connections between being gay and being happy, and last but not least, dignity and being gay.

Learned Ignorance in the Medicine Bow Mountains Craig Clifford, 2008. This book is an apologia for the rooted intellectual against the disdainful condescension of the cosmopolitan intellectual, an apology in the Socratic sense of the word. It reflects the author's Texas rootedness unapologetically and offers a polemical but thoughtful indictment of the intellectual prejudice against rootedness, but it is ultimately about the universal human struggle with origins.
