

Math Lesson Plan — Fourth Grade

Topic:Computation and Estimation

SOL:4.5 The student will estimate whole-number sums and differences and describe the method of estimation. Students will refine estimates, using terms such as closer to, between, and a little more than.

Lesson Objective: The students will learn how to estimate amounts in order to get as close as possible to a whole, as well as conceptualize numbers, adding, and subtracting.

Teacher:

- N/A

Student:

- Paper and pencils
- Sales flyers from local newspapers
- Calculators

Ideal layout of the classroom for this lesson: Students will work in pairs, so either have the students move their desks together in order to best talk about the sale fliers with a partner, or else move to have the pairs sitting close to one another.

Warm-up to lesson: Before you begin this lesson you could discuss the importance of "mental math" with your students as well as adding/subtracting decimals.

Reflection:

1. Have the students describe their estimation methods in writing, and then hold a class discussion on this topic.
 - a. Why are estimation skills important? Does your mom/dad carry a calculator?
2. Did students use compatible numbers that are easy to add and subtract mentally?
